The science of better heating, now with beautiful new colors!

Technology meets Design.

Slant/Fin is America's best known manufacturer of baseboard heating equipment. Since 1949 contractors and homeowners have come to know and trust Slant/Fin.

Our hot water baseboard perimeter system surrounds you and your family with heating comfort. It is the most efficient, most comfortable heating system of all! But what's more, all of our most popular Premium Baseboard and Commercial Fin-Tube Radiation models are now available in decorator colors! Perfect for home renovations or new construction!

Slant/Fin Decorator Series baseboard, in appliance-like finishes, is an affordable option to take decorating to new heights.

With the durability of a powder coat finish and galvanized, rust-resistant steel, Decorator Series baseboard is very versatile.

We have the colors that go in any décor!

Now available for Premium Baseboard* and Commercial Fin-Tube Radiation!

Designed to heat and enhance.

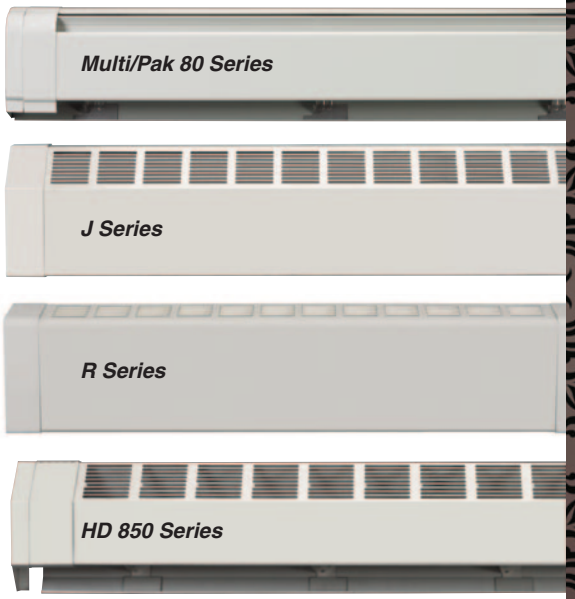
- **America's #1 baseboard brand now enhances any décor**
- **Available in 9 decorator colors**
- **Scratch Resistant, appliance like finishes**
- **Easy to clean and keep beautiful**
- **Environmentally friendly process using 100% organic compounds**

Robust yet beautiful.

Powder coating is a type of coating that is applied as a free-flowing, dry powder. It is applied electrostatically and then cured under high-heat to allow it to flow and form a baked enamel finish. Because powder coating does not have a liquid carrier, it produces a thicker coating than conventional liquid coatings without running or sagging. It creates an extra hard finish that is tougher than conventional paint.

Slant/Fin's electrostatic powder coating process employs charged particles to efficiently paint the baseboard. The result is a longer lasting, more durable and easy to maintain baseboard finish.

**** Includes 30 series and 80 series. Painting on commercial product is not limited to products shown, see (R-01C) for details. Check our Radiation Price Book (R-01) and Commercial Radiation Price Book (R-01C) for pricing details. Paint chips are available upon request.***



Style and elegance, with warmth and comfort.

We've selected our new decorator colors with you in mind. With this new variety of colors now being offered, we have made interior decorating more exciting and fun. Decorator Series baseboard can now be part of your design experience and enhance any décor!
