

NKF-H010CH Dual Action Commercial Style Pull-Down Bar/Prep Faucet

CARE AND MAINTENANCE

Glacier Ice

Glacier Ice Professional Faucet & Sink Kit - Say goodbye to stubborn hard water stains. Minerals like magnesium and calcium naturally build up over time, leaving sinks and faucets looking dull and dirty. Novatto's Glacier Ice Restore Cleaner is specially designed to cut through tough deposits on glass, porcelain, copper, stainless steel, and stone. Even better, this powerful two-in-one system doesn't just clean, it seals and protects surfaces from future buildup, corrosion, mold, and even oxidation. Keep your bathroom looking fresh, clean, and like new.

Novatto faucets are designed for easy maintenance and long-lasting beauty. To keep your faucet looking like new, simply wipe it down with a soapy sponge or soft cloth, rinse, and dry. If mineral deposits or grime accumulate, use a non-abrasive cleaner such as *Novatto's Glacier Ice Faucet & Sink Restorer and Cleaning Kit with Sealer,* or any cleaner formulated for delicate finishes.

Caution: ***Avoid using metal brushes, scouring pads, or abrasive cleaners, as they may scratch the surface and damage the finish. Additionally, avoid contact with steel or other abrasive objects that could scratch or damage the faucet's finish.***

Combining both function and elegance, Novatto faucets make a bold statement with their contemporary design. With a variety of finishes, these faucets are perfect for any bar setup, offering versatile options to match your style. Each faucet is crafted with high-quality components, including a ceramic cartridge for drip-free performance and a swivel for easy access to all areas of your sink.

Whether you're creating a modern focal point or complementing your existing décor, Novatto faucets provide a distinctive look. To ensure proper installation, we recommend enlisting the help of a professional plumber.
