Suitable Only For Use As Service Equipment

For Overhead or Underground Service

Line terminals A1 and B1 are installed for underground service entry as shown in the wiring diagram. For overhead entry, reposition service bus per enclosed instruction sheet.

Unused neutral branch terminals may be used to terminate equipment grounding wires in the combinations indicated for equipment ground bar terminals.

General Information:

Circuit breaker trip position is indicated by handle position midway between ON and OFF. To reset, move handle to OFF position then turn ON.

Any 80-100 Amp max. circuit breaker must be installed in the lowest position in the branch panel. All other positions are limited to 70 Amp max. circuit breakers.

Use 60/75° C Copper or Aluminum Wires

Short Circuit Current Rating (Watt-hour Meter not included in short circuit rating)

This panelboard has a maximum short circuit current rating of 22,000 Amps RMS symmetrical, 120/240 V~. The correct branch circuit breakers and main/branch breaker series combinations to be used for various short circuit current levels are listed in the tabulation below. Any circuit breaker installed, replaced, or added in this panelboard must be manufactured by Siemens and must be of the correct type as indicated in the tabulations below. Use of other circuit breakers in this equipment will void the warranty.
