Use and Care Manual

Assembly

Tool-free assembly: Connect 16mm solid iron tubes and UV-resistant virgin PE grid panels with spiral screw-in joints. Tighten joints firmly for rust-resistant, stable connections. Assemble into flexible shapes (wall-mounted, garden arch, freestanding, column, triangle, or half-fold) as needed.

Usage

Ideal for supporting climbing plants (rose, clematis, grape, pea, tomato, green bean, etc.). Use the included 65.62ft garden twist tie to gently secure plant stems. Suitable as a partition fence, decorative trellis, or plant support for indoor and outdoor use.

Care

Wipe the iron trellis regularly with a dry cloth to prevent dust and rust. Clean stains with mild soapy water if necessary. Avoid harsh chemicals. Store in a dry place when not in use for a long time. Do not overload with excessively heavy plants to avoid damage.
