

Airbase Pro Tech Pneumatic Spray guns by EMAX Compressor are High-Volume Low-Pressure Spray Gun. (HVLP) Our Pro Spray guns significantly increase material transfer efficiency when compared with traditional spray guns. This is because paint fog rebound, and loss is greatly reduced, while paint pattern widths can increase by 10% - 30% for reduced labor hours and improved surface coverage. HVLP technology is also environmentally friendly and reduces exposure to paint fumes.

All Airbase Pro Tech Spray guns come with both an Aluminum cup and Plastic cup, along with high strength color zinc wrench.

Our Premium clear coat spray gun with its 1.3 high performance is ideal for spraying an entire surface. This is ideal for thinner base coats, waterborne and single stage paints.

Airbase by EMAX is including a limited lifetime warranty on the gun body, guaranteed to be free from defects in workmanship – 1 year on all parts excluding wear and tear parts. Wear and tear parts carry a 90-day warranty. Shipping cost for warranty parts is covered for the first 90 days after purchase.

The high-pressure low volume gravity design makes your paint jobs a breeze. Equipped with a control valve to help create the perfect spray.

Our all steel body design is rust resistant and the stainless-steel nozzle provides great durability.

With our easy to control tethering trigger you can use the exact pressure and amount you need for your task.

Our Airbase Pro spray guns are equipped with precise nozzle size that is perfect for any application you use it for.
