Use and Care Manual

Installation: Equipped with cross connectors for easy assembly and disassembly, allowing free adjustment of height and length.

Usage: Secure the support in firm soil to ensure stable placement. Use climbing net, cable ties and garden clips to help guide vines upward.

Cleaning: Wipe clean with a dry cloth or soft brush; do not scrape the plastic surface with sharp tools.

Inspection: After long-term outdoor use, regularly check whether the connections are secure. Wipe off accumulated water promptly after rain. Disassemble and store in a dry, ventilated area when not in use to resist moisture and sunlight, extending service life.

Precautions: Avoid vigorous shaking or impact to the frame during daily use to prevent loosening of connectors.
