- Weight Capacity: Up to 80 lbs per bracket when properly installed into wall studs

PACKAGE CONTENTS

- 8 x Shelf Brackets
- Mounting Screws and Wall Anchors
- Installation Accessories
- Level Tool

INSTALLATION INSTRUCTIONS

1. CHECK BOARD SIZE

Confirm that your shelf board matches the bracket dimensions before installation. The bracket is designed for nominal 1 in. x 12 in. and 2 in. x 12 in. boards with an actual width of approximately 11.25 inches.

2. MARK INSTALLATION LOCATION

Place the bracket against the wall at the desired height. Use a level to ensure the bracket is positioned straight. Mark the screw hole locations.

3. INSTALL THE BRACKETS

For maximum support, install brackets directly into wall studs whenever possible. Use appropriate screws and anchors according to your wall type.

4. ATTACH THE SHELF BOARD

Place the shelf board onto the installed brackets and secure it using suitable screws through the bracket mounting holes.

5. FINAL CHECK

Confirm that all screws are tightened securely and that the shelf is level before placing items on the shelf.

INSTALLATION TIPS

- Always verify wall structure and mounting surface before installation.
- Use multiple brackets for longer shelves to improve stability.
- Do not exceed the recommended weight capacity.
- Load capacity depends on installation method, wall condition, and hardware used.

APPLICATIONS

Suitable for living rooms, kitchens, bedrooms, bathrooms, offices, garages, laundry rooms, storage rooms, and other indoor spaces.

30-DAY LIMITED WARRANTY

This product includes a 30-day limited warranty. If the product has quality issues or defects during the warranty period, please contact customer support for assistance. Warranty coverage applies to product defects under normal use conditions and does not cover damage caused by improper installation, misuse, modification, or exceeding recommended load limits.
