Use and Care Manual - Medicine Cabinet

Installation Precautions

1. Professional Installation Recommended: This product must be installed by qualified professionals. The company shall not be liable for any product damage, wall damage, personal injury, or property loss resulting from installation by the user or unqualified personnel.

2. Verification of Wall Structure and Load-Bearing Capacity: Prior to installation, the user or installer must confirm that the wall's material, structure, and load-bearing capacity are sufficient to safely support the product and its maximum designed load over the long term. Installation directly onto non-load-bearing or insufficiently strong walls (e.g., hollow bricks, plasterboard) is strictly prohibited. Liability for accidents caused by neglecting this clause, such as falling, rests solely with the installer or user.

3. Avoidance of Concealed Utilities: Before drilling, the user is responsible for professionally identifying and avoiding all concealed utilities within the wall, including electrical wiring, water pipes, and gas lines. The user or installer assumes full liability for compensation for any damage to utilities and resulting consequences caused by drilling.

4. Correct Use of Original Accessories: Installation must strictly follow the provided installation guide and use only the included original installation accessories (e.g., screws, wall anchors). The company is not responsible for any issues arising from the use of non-original accessories or improper installation methods.

5. Installation Environment Requirements: This product is designed for indoor use. The installation environment should be dry, well-ventilated, and free from corrosive gases. For high-humidity environments (e.g., bathrooms without wet/dry separation), the user must ensure adequate ventilation. The company is not responsible for moisture damage, mold, or hardware corrosion caused by an unsuitable environment.

Usage Precautions

1. Load Limit Warning: The total weight of stored items must not exceed the product's stated maximum load capacity. Distribute items evenly to prevent shelves from deforming or damaging due to long-term concentrated stress. Exercise extreme caution when placing heavy or sharp objects.

2. Usage Specification Warning: Open and close doors and drawers gently. Avoid slamming, hanging on doors, or allowing children to climb or hang on the cabinet. Any structural damage, hardware detachment, or product falling caused by misuse is not covered under the warranty.

3. Cleaning and Maintenance: Clean with a soft, damp cloth, optionally using a neutral cleaner. Do not use acid, alkaline, strongly corrosive, or abrasive cleaners, as they may permanently damage the cabinet surface, coating, or hardware.

4. Child Safety: Parents or guardians should inform children of the risks, ensure the medicine cabinet is not used as a toy, and store medicines or hazardous items out of children's reach. Liability for accidents caused by guardian negligence rests solely with the guardian.

---

5. Regular Inspection and Maintenance: Users should regularly (e.g., every six months) check the cabinet's installation firmness and the tightness of screws on hinges and slides. If any looseness, deformation, or malfunction is detected, stop use immediately and contact a qualified professional for inspection and tightening. The company bears no responsibility for any consequences arising f rom the neglect of regular maintenance.

Disclaimer: Installation and/or use of this product constitutes the user's full reading, understanding, and unconditional acceptance of all terms herein. The company shall not bear any legal or financial liability for any direct or indirect losses arising from the violation of any of the above precautions.
