GRASS SEED

GENERATIONS OF TRUST.

At Pennington, our relationship with the grass seed we sell starts long before your seed is grown. While most grass seed companies buy their seed on the open market, we are the only major grass seed company that works directly with a network of dedicated growers.

Built on decades of trust and integrity, our relationships with seed growers and their families now span multiple generations. Our legacy of working directly with farmers to bring you the finest grass seed possible helps ensure their success and ours. At Pennington, we know our seed and the farmers who grow it. From field to final product, that's the Pennington way.

IS CONTRACTORS MIX THE RIGHT SEED FOR YOUR LAWN?

Set the course for a high-performance, professional-grade lawn with Pennington® Contractors Mix. This bag contains varieties that are formulated for your region, so you can rest easy knowing the seed mix you buy will provide quick, dense, professional-grade results.

¿CONTRACTORS MIX ES LA SEMILLA ADECUADA PARA SU CÉSPED?
Prepare el terreno para un césped de alto rendimiento, de calidad profesional con Pennington Contractors Mix. Esta bolsa contiene variedades que están formuladas para su región, para que usted pueda estar tranquilo sabiendo que la mezcla de semillas que compra proporcionará resultados rápidos, densos, de calidad profesional.

FEATURED CHARACTERISTICS OF CONTRACTORS MIX	IDEAL FOR NEW LAWNS, REPAIRS AND OVERSEEDING
sun requirement: 4-6 HOURS	planting depth: 1/4"
see results in: 7-21 DAYS	mowing height: 3"

VERY GOOD	GOOD	GOOD	GOOD	GOOD

WHERE WILL THIS SEED GROW BEST?

Grows anywhere in the USA

WHEN SHOULD THE SEED BE PLANTED?

Early Spring or early Fall

HOW MUCH SEED SHOULD BE USED?

New Lawns	12 lbs / 1,000 sq ft
Overseeding	5 lbs / 1,000 sq ft

4 EASY STEPS

FOLLOW THESE INSTRUCTIONS TO WOW YOUR NEIGHBORS

EN CUATRO PASOS SENCILLOS: Siga estas instrucciones para impresionar a sus vecinos

STEP 1 — PREPARE

FOR BARE SPOTS/NEW LAWNS:
Remove debris, then rake the soil to loosen and smooth the top layer.

PARA ZONAS CON HUECOS O CÉSPED NUEVO: Retire los desechos y luego rastrille la tierra para aflojar y suavizar la capa superior.

FOR OVERSEEDING/THIN AREAS:
Start by mowing existing grass as short as possible followed by removing debris. Then rake the soil to loosen and smooth the top layer.

PARA RESIEMBRA O ZONAS DELGADAS: Corte el césped existente lo más corto sea posible y elimine los desechos. Luego, rastrille la tierra para aflojar y suavizar la capa superior.

STEP 2 — APPLY FERTILIZER

Apply a starter fertilizer at the manufacturer's recommended rate.

APLIQUE UN FERTILIZANTE: Aplique la cantidad de fertilizante recomendada por el fabricante.

STEP 3 — APPLY SEED

Spread the seed evenly using a drop, rotary or hand-held spreader according to the recommended spreader settings listed. Rake gently to work your seed & fertilizer into the soil.

APLICACIÓN: Disemine las semillas de manera uniforme con un esparcidor de caída, rotativo o manual, de acuerdo con las configuraciones recomendadas y enumeradas del esparcidor. Rastrille suavemente para que las semillas y el fertilizante germinen en la tierra.

STEP 4 — WATER

Keep the soil moist by watering daily as needed until grass sprouts and reaches about 3" tall.

RIEGUE: Mantenga la tierra húmeda al regar la que sea necesario por día hasta que el césped brote y alcance alrededor de 3 pulgadas (7,62 cm) de alto.

ADDITIONAL CARE TIPS

CONSEJOS PARA EL CUIDADO DEL CÉSPED

1. Mow lawn when grass height reaches 3" tall
   Corte el césped cuando este alcance los 3 pulgadas de altura.
2. Avoid removing more than ½ of the total grass blade length in any single mowing
   Para mantener su césped grueso y saludable, no quite más de ½ del total de la longitud de la hoja en una sola corrida.
3. Hot summers can be stressful on your lawn; increase the mowing height during hot and dry periods to reduce stress on your lawn
   Los veranos calurosos pueden ser estresantes para su césped. Aumente la altura del corte durante los períodos calientes y secos para reducir el estrés en su césped.

MOST IMPORTANTLY -
Don't kill the grass before it starts by using weed control (pros call it preemergent) on your lawn until your grass has reached its full mowing height of 3"
Es muy importante que no utilice control de malezas en su césped hasta que el mismo haya alcanzado su máxima altura de corte de 3 pulgadas. ¡Esto podría matar a su césped!

RECOMMENDED SPREADER SETTINGS

CONFIGURACIÓN DEL ESPARCIDOR RECOMENDADA

SPREADER TYPE ESPARCIDOR	OVERSEEDING/ THIN AREAS PARA RESIEMBRA	BARE SPOTS/ NEW LAWNS PARA NUEVO CÉSPED
