Upgrade·The Home Creator Way

30M+ Users

200+ Warehouses Worldwide

50+ Countries

VEVOR is a home improvement brand empowering Home Creators to upgrade spaces with pro-level products at exceptional value.

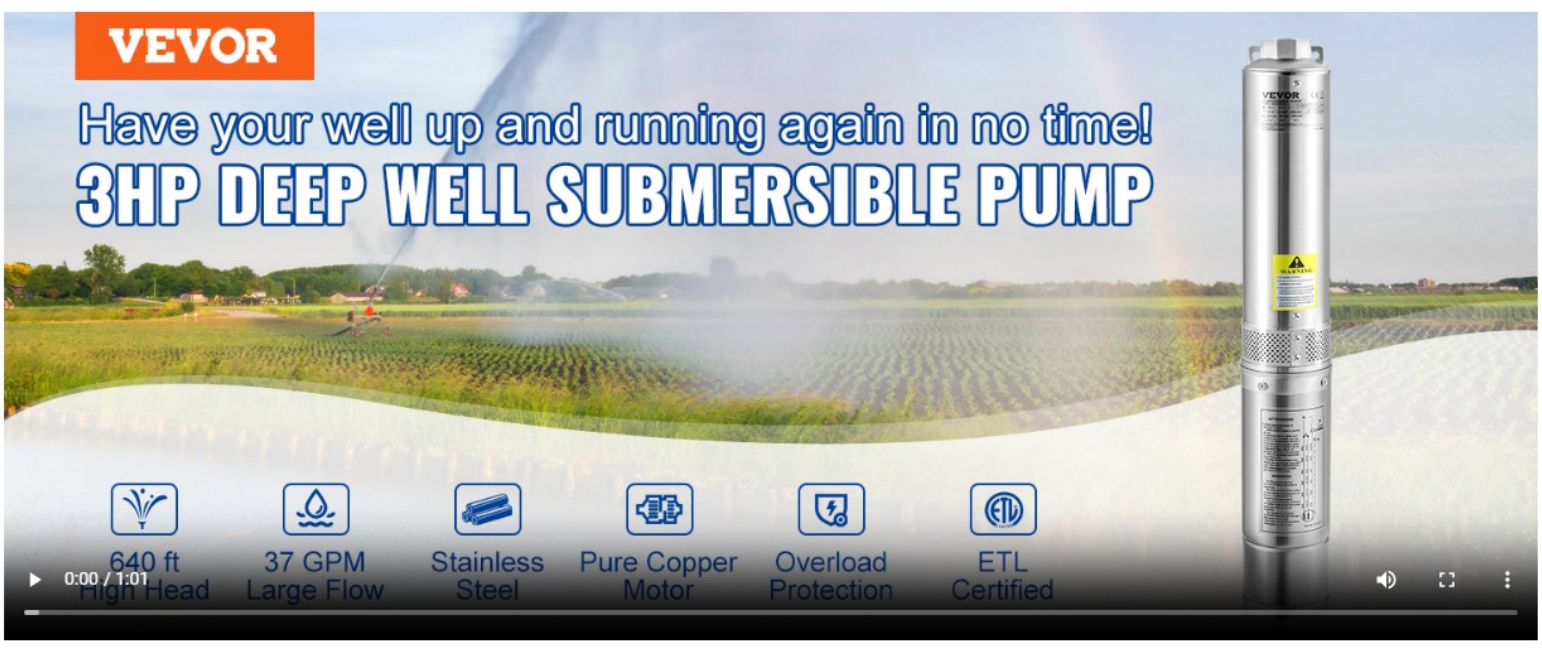
We deliver superior performance through practical tech innovation that blends purposeful technology with the hands-on joy of creation.

We break down price barriers so every upgrade reflects your vision to life.

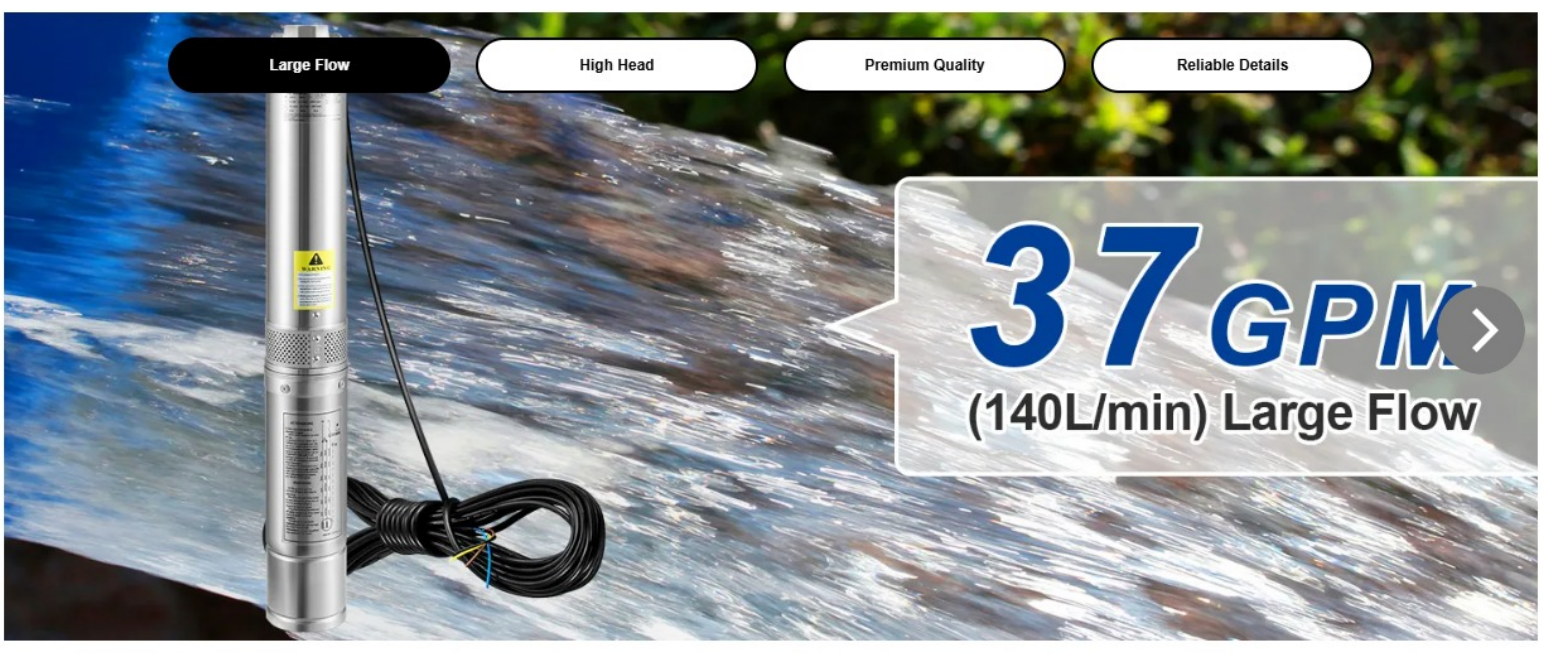
Upgrading every space isn't just a task—it's a declaration of reinvention.

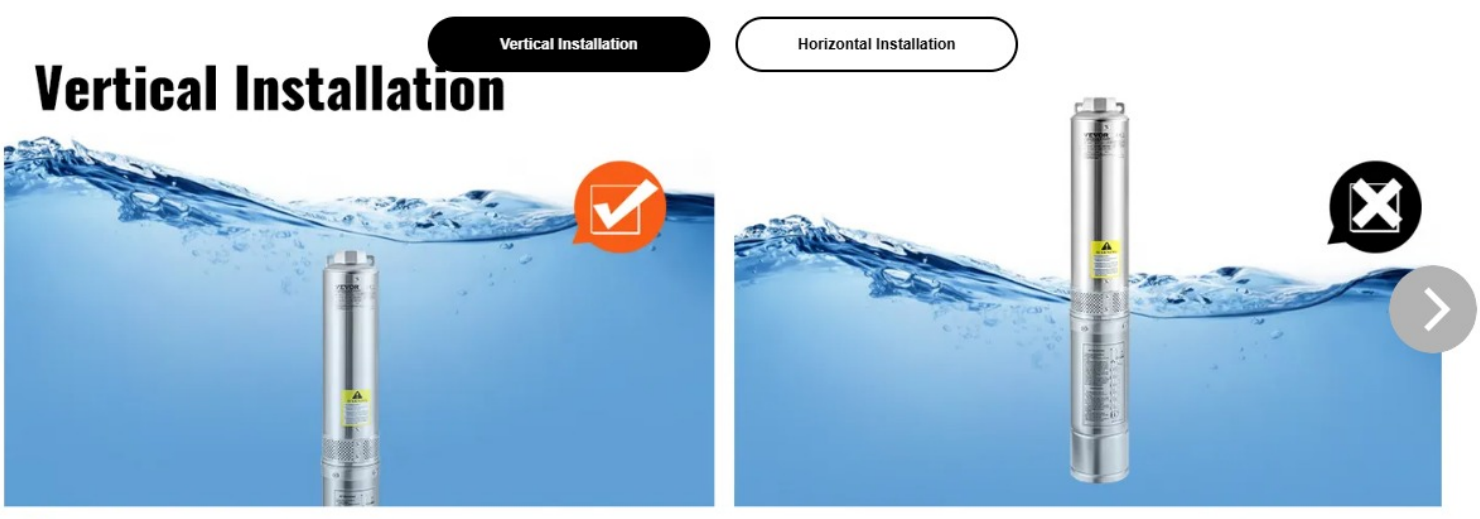
Upgrade with VEVOR!

Enjoy Quick Pumping with Deep Well Pump



Are you worried about the water supply for your family or farmland? Well, get ready to have your well up and running again in no time! Our deep well submersible pump provides a large flow and high head lift, meeting all your water needs. Pump it up today with our submersible well pump!





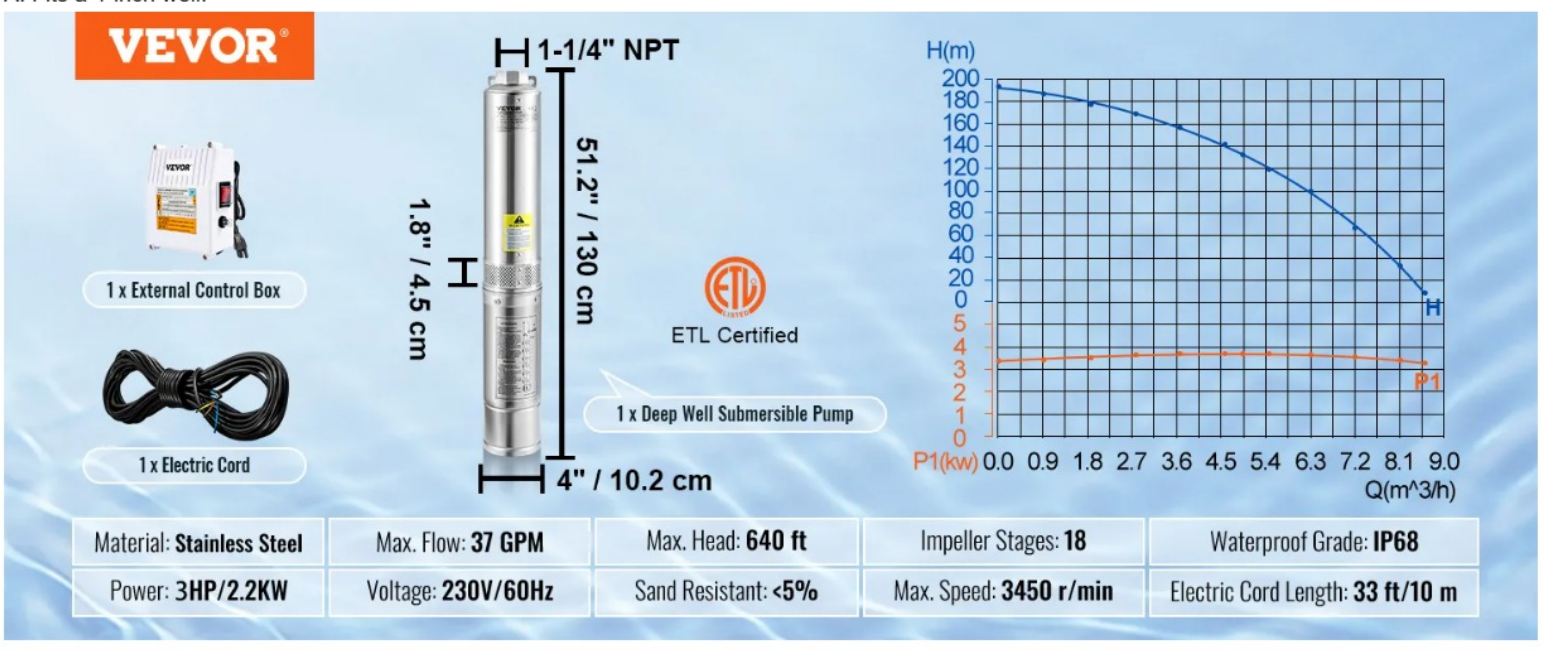
⚠ Warning: DO NOT use it without water or at low water level to prevent burning.

Q: How long is the electrical cable that comes with the pump?
A: 33 ft.

Q: Does this deep well pump have the wire splice kit included?
A: Yes.

Q: Does this deep well pump require a foot valve or some type of screen on the bottom?
A: This pump has a built-in check valve. However, it is always recommended to install additional check valve(s) on top of the pump and above. Thank you.

Q: How many inches of wells does this pump fit?
A: Fits a 4-inch well.



Heavy-Duty Deep Well Pump for High-Pressure Water Supply

Enhance your water access with this deep well pump. It is designed to lift water efficiently for various needs, from farming to home use. This pump is durable, reliable, and long-lasting and is built to handle deep wells. It combines advanced technology with solid materials to ensure powerful water flow and high efficiency. With easy installation and maintenance, this submersible water pump is an excellent choice for accessing deep underground water sources.

High Performance & Unwavering Power

The VEVOR deep well pump delivers top-notch performance and reliable power. With a strong 3HP motor and 230V power, it's built to handle demanding water-pumping tasks. It fits in well casings that are 4 inches or more prominent and has a discharge size of 1-1/4" NPT. The pump features 18 durable thermoplastic impellers.

This allows it to move up to 37 gallons of water per minute and reach a depth of 640 feet. It comes with an external control box and a 33-foot electric cord. This makes it easy to use even without modern plumbing. This industrial water pump is designed to make your water needs easier and more efficient.

Premium Stainless Steel Construction

Ordinary well pumps might experience issues with rust and corrosion, which can lead to frequent repairs or replacements. The VEVOR deep well pump is built with premium stainless steel, which makes it very strong and long-lasting. This premium material is used to construct the entire pump, including the connections and output. This implies that even when submerged for an extended period of time, it won't rust or corrode.

With an IP68 waterproof rating and an ETL certification, it is built to last for eight to ten years. The robust stainless steel structure aids in preventing corrosion and breakage damage. It is therefore a dependable option for water pumping. You can depend on this irrigation water pump to function efficiently and last over time.

Powerful Copper Motor

The copper motor ensures durability and built-in overload protection for a worry-free water supply. The powerful copper machine of the VEVOR deep well pump ensures strong and dependable performance. It is long-lasting and composed of premium copper. It effectively maintains the water's smooth flow.

If you've had issues with other well pumps, this one is designed to be different. The copper motor and precision rotor promise long-term, stable operation. Additionally, this stainless steel water pump has an integrated overload protection system. This cuts the engine in the event of a malfunction or jam to prevent damage and overheating.

Advanced Filtration & Check Valve System

This deep well pump maintains its proper operation and guarantees that you receive clean water. It includes an integrated check valve to prevent water from returning to the well. This helps keep the water pressure steady. For extra safety, you can add another check valve if needed. The pump also features a stainless steel mesh that filters out dirt and impurities.

You can use this pump on a new well with a lot of sediment. Just add a layer of gauze in front of the mesh helps catch more of the debris. This system is designed to make your life easier. This irrigation water pump ensures that your water is clean and reduces the need for frequent maintenance. Overall, this setup simplifies the use of the pump and protects it from potential problems with water flow.

Effortless Installation

Simple installation saves you the added costs of hiring professionals. The VEVOR deep well pump is designed for effortless installation, making it easy to set up. You can install it vertically or horizontally, so it fits well in different setups. This flexibility helps you place the pump in the best spot for your needs. With this setup, setting up the pump is straightforward and quick, saving you time and effort.

Whether you're experienced or new to installing pumps, the VEVOR deep well pump is easy to handle, letting you get it working without fuss. To keep the pump working well, immerse it in water before you start it fully. This helps avoid problems from running this irrigation water pump while it's dry for too long. You should follow this step to keep the pump in good shape and ensure it works properly.

Versatility Across Multiple Applications

The VEVOR deep well pump is very versatile and can be used in many ways. It provides water to homes, water crops on farms, and drains water in cities, factories, and mines. It also works well for gardens, helping with watering and sprinkling. Whether you need water from deep wells, reservoirs, canals, or rivers, this stainless steel pump does the job reliably.
