

Care & Maintenance

Cleaning Wildridge Furniture

All Wildridge furniture is made from our HDPE (High-Density Polyethylene) poly lumber—a material designed to resist fading, mold, mildew, and moisture. It won't rot, splinter, or crack, but it still benefits from occasional cleaning.

Steps:

1. Remove cushions or fabric accessories.
2. Wipe down using nonabrasive soap, water, and a clean rag.
3. For stubborn dirt, lightly scrub using a soft nylon brush.
4. Rinse with fresh water to remove any soap residue.
5. Allow to air dry or towel dry.

Note: Avoid placing hot objects or items that could leave stains (such as metal containers or rubber feet) directly on the furniture surface.

Cleaning Stainless Steel Hardware

All Wildridge furniture uses 316 marine-grade stainless steel fasteners, offering excellent corrosion resistance in any climate.

To maintain hardware:

- Rinse periodically with fresh water and mild soap, especially in coastal or humid environments
- No harsh cleaners or polishing agents are needed

Cleaning Cushions & Pillows

Wildridge cushions and pillows are made with Sunbrella® outdoor fabric, designed for superior durability, UV resistance, and easy maintenance.

To clean Sunbrella® fabric:

1. Brush off loose dirt
2. Moisten the fabric with a sponge or wet towel. Spray a light mist of fabric cleaner over the entire surface.
3. Use a sponge or clean towel to gently break up any stains.
4. Rinse with fresh water to remove any soap residue.
5. Allow to air dry or towel dry.

Note: If cushions become saturated, unzip and stand upright in a sunny spot to help the foam dry completely. Dry time may vary with humidity.
