200+ Warehouses Worldwide
50+ Countries

VEVOR is a home improvement brand empowering Home Creators to upgrade spaces with pro-level products at exceptional value.

We deliver superior performance through practical tech innovation that blends purposeful technology with the hands-on joy of creation.

We break down price barriers so every upgrade reflects your vision to life.

Upgrading every space isn't just a task—it's a declaration of reinvention.

Upgrade with VEVOR!

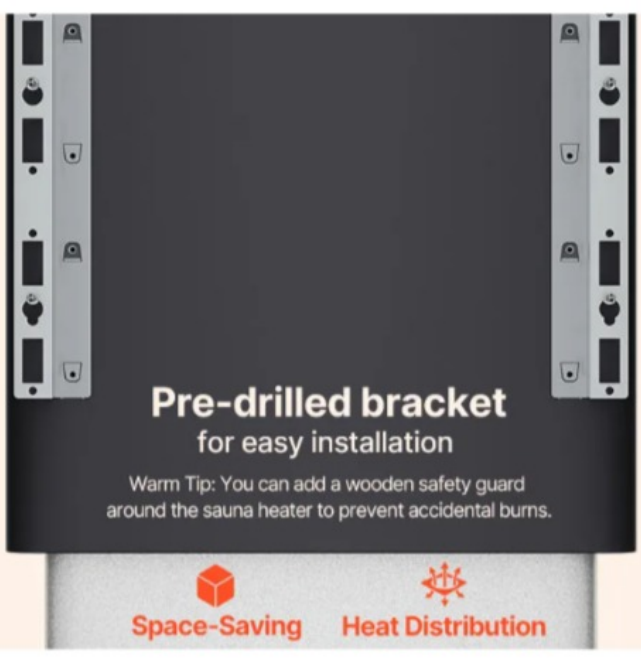
Experience the Ultimate Sauna Retreat with VEVOR Sauna Heater

Do you need a break? Whether you want to relax or soothe tired muscles, our sauna heaters help maintain your overall well-being. With 6KW power, 176-318 cubic feet heating capacity, and precise temperature control, our commercial sauna heater will redefine the way you experience relaxation.

Sauna Heater for 3 to 5 Users

Fits Sauna Rooms
176-318 cu.ft

The indoor sauna heater is built with high-quality stainless steel or aluminized zinc, designed to provide fast heating, allowing you to enjoy your sauna session without waiting for extended periods.



With a maximum temperature of 230 °F and a maximum time setting of 3 hours, the sauna heater provides flexibility and control over your sauna experience.

Adjustable Temperature & Timer

Time Range
0-180 Min

Temp Range
95-230°F / 35-110°C

The external controller allows you to easily adjust the temperature and time settings of the sauna heater from outside the sauna cabin. Choose from two convenient modes to suit your needs.

Q1: Why doesn't the sauna heater come with a plug?

A1: For safety reasons, this product does not include a plug and must be hardwired by a licensed electrician.
You'll need to purchase external wiring and an air switch separately. We recommend 9 AWG cables and a switch rated ≥ 36A.

Q2: What is the smell when first using the heater?

A2: The heating elements are coated with anti-rust oil. A slight odor may occur during the first use. Just keep the sauna door open for 10–15 minutes, and the smell will go away.

Q3: Why doesn't it feel hot enough?

A3: Your sauna room may be too large for the heater's capacity. As a rule of thumb, you need 1kW of power per cubic meter of sauna space.
Please ensure you're using the correct heater size for your room.

Q4: Does this product include sauna stones?

A4: This product does not include sauna stones. Please use appropriate sauna stones or volcanic rocks. Do not use common stones like granite, as their low water absorption and uneven thermal expansion may cause cracking and pose safety risks.

Wall-mounted design minimizes the hassle and time required for setup, ensuring great heat dissipation.

Item Model Number: **SCA-60NS**
Rated Power: **6 kW**
Power Supply: **AC 220–240V, 50/60 Hz**
Applicable Room Size: **176–318 cu.ft (5–9 m³)**
Recommended Sauna Stones: **22-33 lbs / 10-15 kg**
Net Weight: **22 lbs / 10 kg**
Product Dimensions: **16 × 10.6 × 22 inch / 410 × 270 × 560 mm**

4X Bracket Screws
3X Fork Terminals
