SAMSGAZEBOS®

Cupolas Use and Care Manuals

Thank you for purchasing SamsGazebos® products. These instructions include helpful hints and information necessary to properly maintain your cupola for many years of enjoyment.

Install optional roofing material

1. Install optional roofing material such as shingles, shakes, or composite shingles of your choice unless already roofed.
2. Finish to your liking. Treating with wood preservative, Copper Brown® or Copper Green® is highly recommended and available at your local Home Depot® store prior to finish.
3. Fasten it with screws where desired.

Recommended Finishes

Calk into joints is strongly recommended prior to any finish for the best results.

We recommend exterior solid deck stain over paint for easy maintenance.

Please consult with your local Home Depot® store for finishing options.
