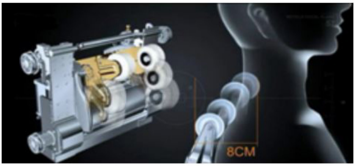
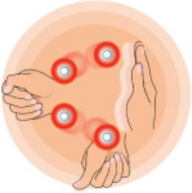
3D S-Track Massage Technology



Experience the most humanlike massage from Osaki. The newly enhanced 3D massage designed to massage wider and deeper than the conventional massage rollers. The 3D technology allows you to extend out the massage heads up to 8 cm for an intense deep massage. The 3D technology has intensity levels from 1 to 5, ranging from mild to strong. With 3D technology, reaching and massaging the acupuncture points becomes effortless with **accurate** precision and depth, leaving you revitalized.

Quad Roller Head Massage System

The OS-Pro Dreamer is equipped with twin rollers to mimic the feel of human thumbs & fingers, enhancing the massage experience.

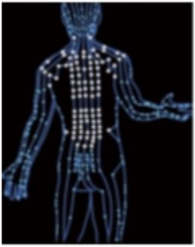


2nd Generation S-Track

The massage track is designed to contour the human back more than ever and to enhance the movement of the massage heads with better accuracy.

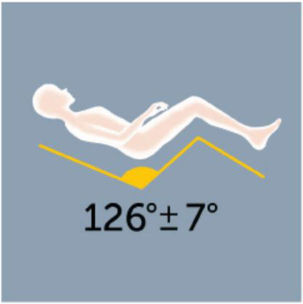
Accupoint Technology

You have approximately 350 acupoints in your body, with nearly 100 in your back and neck alone. From the soothing palm style massage of the Swedish massage, to the deep tissue kneading of the shiatsu style massage, the OS-3D Pro Dreamer zero gravity massage chair has a variety of techniques to target the acupoints with precision.



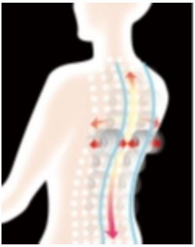
2 Stage Zero Gravity

Introduced by NASA more than 2 decades ago, the zero gravity position is a relaxing and stress-free position on your body, minimizing the pressure along the back and spine region. There are 2 stages of zero gravity, the 2nd being more reclined. When reclined fully, your legs are higher than your heart level, resulting in therapeutic effects that are incredibly effective and may be felt immediately.



Computer Body Scan

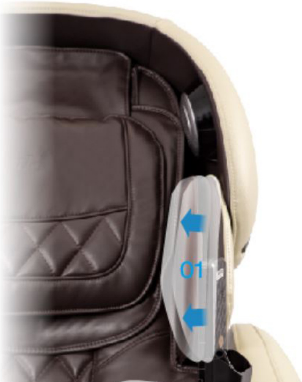
Computer Body Scan GPS
The 3D point navigation system uses the pressure sensor technology, which virtually maps your back (up to 200 sq. inches) for ultimate massage accuracy and efficiency. The 3D Zero gravity system scans your back and delivers a massage that contours the unique spine curve of each individual user of the chair. The "floating" massage heads glide over your back knowing exactly which area to target.



Auto Computer Leg Scan
The calf and foot massager is capable of making adjustments according to each individual's leg length ensuring that the massage air bags are concentrating on the correct areas. At the start of the massage, the chair will fully extend out and then retract. Once the foot massager has reached the desired length, firmly press your toes down to indicate to the chair to stop.

Unique Stretch Massage
The **calf** and **foot** massager is capable of making adjustments according to each individual's leg length ensuring that the massage air bags are concentrating on the correct areas. At the start of the massage, the chair will fully extend out and then retract. Once the foot massager has reached the desired length, firmly press down on your toes to indicate to the chair to stop.

Air Massage

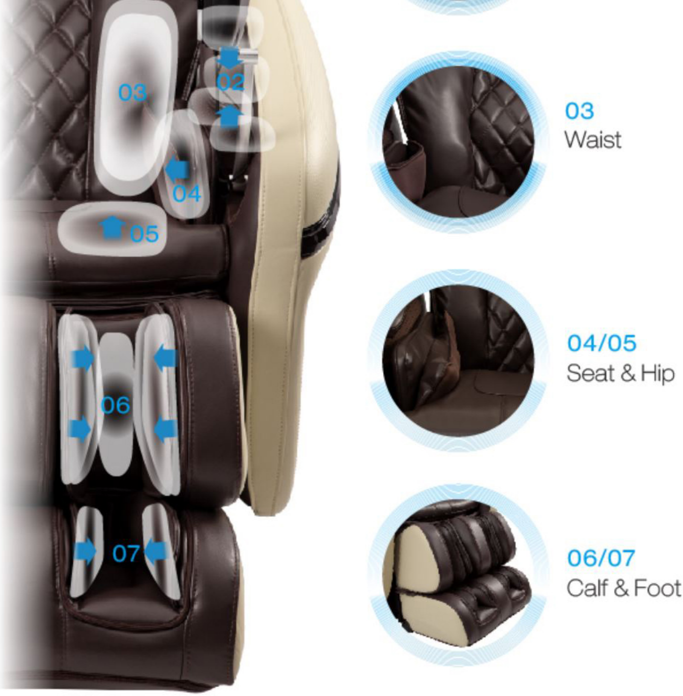


01

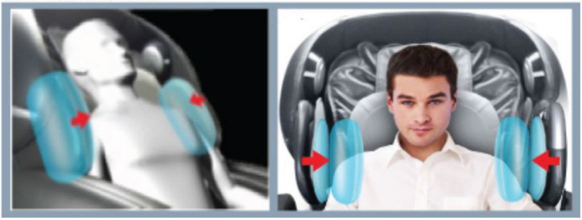
Shoulder

02

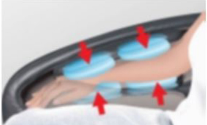
Arm & Hand



Upper Shoulder Massage
Along the outer edges of the left and right side are a set of air bags to provide kneading/squeezing style massage to the outer shoulder area.

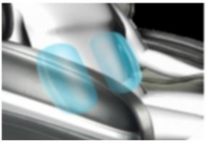


Arm & Hand Massage
Multiple air bags are located on the top and bottom that inflate to apply a compression massage along the forearm and hand.



Waist Airbag Squeeze

2 airbags on each side of the waist area inflate, squeezing the waist and massaging that region. When inflated, the airbags will not only massage the sides of your back but also position you more firmly in the chair allowing for a deeper massage from the back.



6 Airbag Seat and Hip Massage

In the seat and hips are 6 airbags that inflate squeezing the hips inwards. The soft air stimulation works on the thighs by stretching the muscles.

Foot & Calf Airbag Massage

Multiple air bags are located on the top and bottom that inflate to apply a compression massage along foot and calf areas.

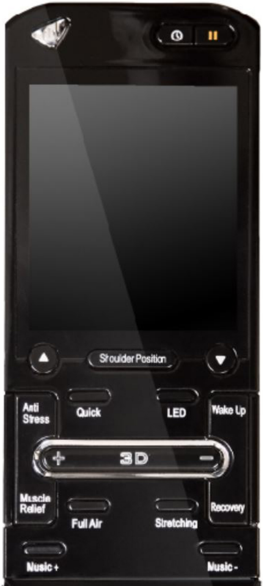
Massage Programs

10 Auto Massage Programs
As the body scan is complete with the 3D point navigation system you can then select from 10 pre-set massage programs all with unique variations.

Width and Strength Adjustment
Adjustment of the massage strength can be controlled with 5 **intensity settings** and 3 levels of width.

INCREDIBLE FOOT ROLLER
Located on the bottom of the feet are 2 rows of spinning reflexogy massagers which provides a soothing kneading style application. As the rollers spin it will **stimulate acupuncture points** and as the air bags inflate it will generate a much **deeper massage.**

LCD Remote



Arti Gravity
Osaki

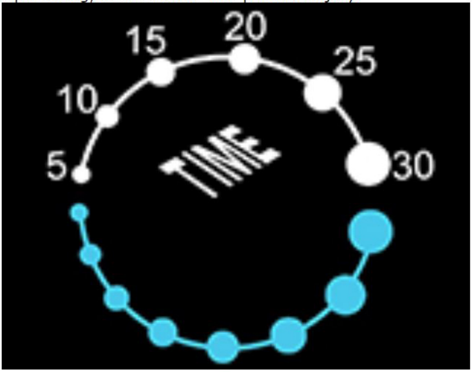
Large LCD Display

At the top of the handheld remote is a large LCD display that displays the actions of the massage chair, showing the time remaining, type of massage being applied, **area of massage, intensity, speed, and much more.**

To access the manual mode simply flip open the lid at the bottom of the remote and select the massage type, intensty, **speed and location**. You can also select independently select the area of the **airbag massage**.

Auto Timer

5-30 minutes of usage can be programmed. This is a safety measure so that if the user falls asleep the massage will not keep running, in the events of a possible injury.



Shoulder Heating

The action of the intensive massage with heating for the shoulder and air massage for the buttocks, make for a more thorough and enjoyable massage. With the seat airbag inflating, it will also force your lower back to press more firmly to the backrest for a stronger and deeper massage.

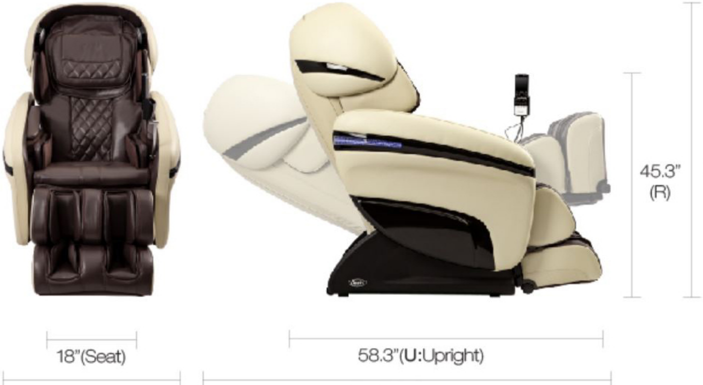
LED Chromotherapy Lights

The OS-3D Pro Dreamer comes with mood setting LED lights. The cool tone LED lights are hidden behind a metallic plexi-glass and is only visible when activated. In a dark room setting, the LED light will cast a cool blue color on the surrounding walls, creating a relaxing atmosphere.

MP3 Player Connection with Speaker

To enhance your massage experience, the chair is equipped with a built in mp3 connection so you can play your favorite music on quality speakers located by your ears, for a direct clean sound. Both volume and song selection can be controlled directly from your mp3 player.

Specification



35.4" 74.8"(**R**:Reclined)

Operating Voltage	AC 110 – 120 V, 50/60 Hz	
Rated power consumption	250 W	
Dimensions assembled	• Approx. Upright	35.4" wide x 48" tall x 58.3" deep
	• Approx. reclined	35.4" wide x 45.3" high x 74.8" deep
Chair weight	231.5 lbs	
Upholstery	Synthetic Leather
