

GETTING STARTED WITH YOUR AREA RUG

New rug, new room! Set up your beautiful area rug perfectly with these pro tips

1

Prep Your Space & Unroll!

Choose the designated area to lay your rug. Clear the space of any furniture and clean the flooring surface. Lay rug pad (recommended not included) flat. Carefully remove the rug from its packaging and begin unrolling from one end of the room to the other.

2

Let's Vacuum

Once the area rug is unrolled and, in its place, vacuum the rug to remove any shedding, dust, or debris. Vacuuming will revive all fibers after being tightly packaged and help to flatten deep rug wrinkles!

3

Remove Those Wrinkles

Due to the wrapping and folding for shipment, wrinkles or creases in your rug are normal but they're not permanent. Use heavy objects like furniture or books to weigh down the corners for a few days, just be sure you don't trip!

4

Rug Pad Recommended

Use of a rug pad is recommended with this area rug. Rug pads can help prevent slipping and sliding on hard surfaces while providing extra comfort underfoot. Please note: all rug pads are sold separately.
