LINON HOME DECOR PRODUCTS, INC.

Thank you for purchasing this unfinished piece of furniture!

These instructions will get you the best possible customized result when finishing this piece of furniture.

Getting Started

SAMPLE BOARD Please find an unfinished sample board included with your furniture. It's enclosed to help you get the best results as you finish the furniture. This small board allows you to test finishes including paint and stains before you start working on the furniture itself.

IMPORTANT Before diving into painting, assembly or other improvements, please carefully read the critical instructions below. Keep in mind that, for best results, furniture should be finished before you assemble it! In that way, the piece will get the most consistent and beautiful finish treatment.

STEP ONE To kick off your finishing project, the best procedure is to take the sample board, solid pine like the furniture, to a paint, hardware or home center store and consult with the paint specialist for recommendations about what paints, stains, wax and varnish work most effectively with solid pine. It's also a good idea to ask the specialist about the best methods of applying the finish recommended.

IMPORTANT Keep in mind that after applying the original finish, whether paint or stain, you should add a varnish or wax as a final application that will give you the best results.

RESEARCH ONLINE Online sources provide finishing advice and tutorials, so you can search generally or on YouTube for instructional videos made by experts covering topics including choosing and applying paints and stains to unfinished wood furniture as well as picking and using varnishes and waxes. Search specifically for instruction for pinewood or softwoods for best results. Please note, whatever brand of finish you select, the corporate website may have additional recommendations and even videos about how best to use the company's products. **Information available online may supplement but should not supersede these instructions, which are specific to your furniture.**

SET UP When ready to finish your furniture, layout all pieces on a covered floor space or tabletop. Ensure all wood surfaces are clean and free of dust. Keep in mind, the cardboard box in which the furniture arrived can be disassembled and used as a floor/table covering. Thorough preparation before painting/staining is crucial to getting the results you want!

Painting and Staining Preparation

SANDING Start by thoroughly sanding your furniture. Begin with a medium grit sanding sponge, recommended for its ability to better address corners, or with sandpaper. Sand all surfaces. Then step down to a fine-grit sanding sponge or sandpaper and repeat. End the sanding process with an extra fine grit sanding sponge, working all surfaces completely. Always sand in the direction of the grain.

CLEAN When the entire piece is completely sanded down, vacuum it to remove dust, debris and other loose material. After completely vacuuming the wood surfaces, use a soft cloth to remove fine dust particles from the wood. This step is crucial to obtaining the best possible outcome.

Painting Process

EDUCATE As noted above, bringing the sample board included with your furniture for evaluation in picking paint or stain (with the help of a specialist at a paint, hardware or home center store) is the best way to begin the actual finishing process. Also, read all manufacturer's instructions on the container, clarifying any unclear information and instructions with the paint specialist or by calling or emailing the manufacturer. Labeling on the can should include contact information, or you can search for the manufacturer's website.

PRIME If you are painting the nook, apply primer as directed by the specialist and /or the manufacturer. If you are using a stain, **DO NOT PRIME**. In any case, please follow stain manufacturer's guidelines.

PAINT OR STAIN After the primer has dried, apply paint as directed. When painting and staining, entirely cover all surfaces. Please note on application, the surfaces may take on a spotty and /or streaky appearance as paint or stain soaks into the wood. Do not apply additional paint or stain to the first coat after the surfaces are completely covered or drips may result. The best final finish requires applications of multiple coats.

SAND AGAIN After the first coat has dried, hand sand the entire surface using a fine grit sanding sponge or sandpaper. This step is critical to getting a pro-quality final finish.

CLEAN Equally critical, once everything is sanded, vacuum again to remove all dust.

SECOND COAT Continue to the second coat, applying additional coats as desired. After the final coat has dried, lightly sand with ultra fine sanding sponge or sandpaper.

FINISH When done painting and sanding, choose the final finishing material. Follow recommendations and all instructions included with the wax or varnish.

ASSEMBLE Now, you can assemble your furniture knowing that the finish is going to make the best contribution to the final appearance it can.

IMPORTANT Keep extra stain or paint for touch-ups after the piece is completely dry and assembled. Use a small paintbrush to touch up areas that need it, particularly around screws and nails.
