

Product Features

The Whynter BBR-638SB/BBR-838SB Beverage Refrigerators are sophisticated additions to any home and are perfect for cooling and storing your favorite beers and canned beverages. With its reversible and elegant full glass door, these compact beverage refrigerators blend well and accent any décor.

Built-In Installation Ready

Its standard counter height makes it ideal for in-cabinet installation and is a favorite to replace that old trash compactor space. The front-venting design allows you to install these beverage refrigerators under a kitchen counter or cabinet for a seamless appearance.

Digital Temperature Control and Soft Internal Lighting

Effortlessly control the LED light and temperature settings of your beverage refrigerator using the digital control panel. While the see-through tempered double pane glass door displays your beverage collection, these units are also equipped with an interior light that makes it easy to find exactly what you're looking for.

Balanced Cooling and Auto Defrost

Features fan-forced circulation to maintain an evenly-cooled space ensuring consistent temperatures throughout the interior for more effective and efficient operation. The auto defrost feature also allows for maintenance-free continuous operation (we still recommend powering the unit off during extended periods of non-usage).

Reversible Door with Lock

These beverage refrigerators have the capability of the door opening from either the left or right side, if you prefer a certain direction or would like the unit to follow the flow of your kitchen design. The cylinder door lock provides protection and additional security from unauthorized access to your beverage refrigerator.

FEATURES

12" Model: BBR-638SB 60 standard 12 oz. can

15" Model: BBR-838SB 80 standard 12 oz. can

- Built-in/Freestanding installation
