Basement Window Cover
Installation Instructions

WHAT YOU NEED

• Self tapping concrete screws

INSTALLATION

1. Place the basement window cover in the desired position.
2. Drill (2) mounting holes on both sides of the basement window cover through the plastic and mark anchor hole locations on both sides of the window.
3. Remove basement window cover.
4. Drill holes and insert anchors.
5. Position cover over window aligning holes with anchors.
6. Secure the cover to the wall using appropriate anchor screws. *(NOTE: If gaps occur because of siding overlap, they may be filled with caulk)*
