

| CLEANING&STORAGE

Regular cleaning: It is recommended to clean the bamboo bath rack every two weeks to prevent the growth of dirt and bacteria. Cleaning frequency can be adjusted according to usage and personal needs.

Cleaning: Use mild soapy water or neutral detergent, dip a sponge into the detergent and gently wipe the surface and grooves of the bamboo bath shelf.

Avoid soaking: Do not fully immerse the bamboo bath shelf in water to clean it, as over-soaking may cause deformation or damage to the bamboo material. Instead, simply wipe the surface with a damp cloth.

Drying: After cleaning, place the bamboo bath rack in a well-ventilated area to dry. Make sure the bamboo is completely dry to avoid mold or mildew growth.

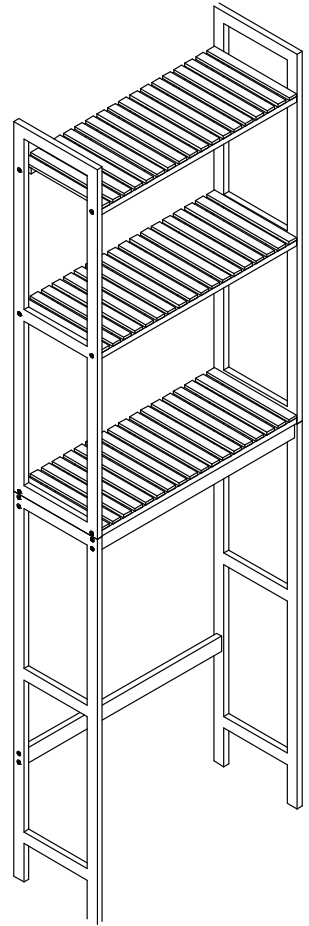

Prevent water accumulation: When using the bamboo bath rack, try to avoid water accumulation for a long time. After use, try to place it in a well-ventilated location so that the water can evaporate quickly.

Regular Maintenance: You can apply some bamboo oil or wood maintenance oil to your bamboo bath rack regularly to maintain the shine and durability of the bamboo material. Please make sure the maintenance oil is completely dry before use.

BAMBOO TOILET STORAGE

NOTICE

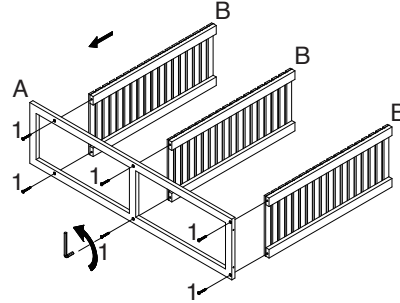

1. Before you begin assembly, make sure you have enough space to set up in order to ensure that the items are put together as quickly as possible.
2. Check that the instructions contain all parts and tools.
3. Do not stand or place heavy objects on the product during assembly to avoid damage.
4. Adjust the product by placing it on a flat surface to ensure it remains stable.
5. Use tools to secure the screws.
6. When tightening the screws, please tighten them 70%-80% and tighten them again after assembly.
7. **WARNING:** Handle all packaging with care and responsibility, keep children and animals away from the work area, swallowing small parts can be dangerous!
