

Acacia Hardwood Interlocking Deck Tiles

[Installation Manual]

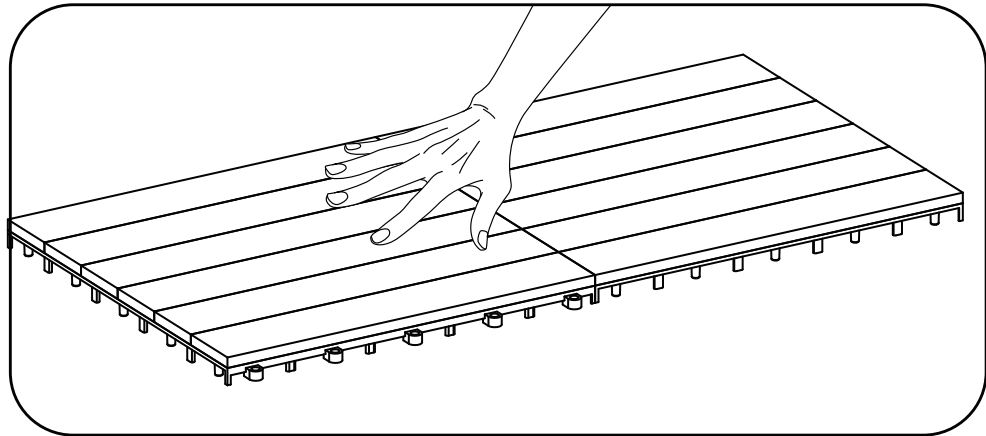

ASSEMBLING PROCESS

1. Position the first plank

2. Align with the buckle on the other side.

3. Confirm and press hard the buckle slot.
The deck tiles can be freely spliced in multiple ways

USE Instructions:

These wooden floor tiles have interlocking snaps on the back for easy and quick installation, no tools are required. You just simply snap them together and place them wherever you want, or detach the tiles for cleaning and storing. Thanks to the use of such solutions, the tiles can be freely arranged. This allows you to create compositions from parallel or perpendicular tiles. The tiles can be used on all types of surfaces. They work well both on the balcony, terrace or in the garden, as well as by a portable pool or bathroom.

MAINTENANCE Instructions:

The base made of plastic is based on distances that separate the wood from direct contact with the ground. This enables good water drainage as well as proper ventilation, which is especially important when using tiles outdoors.

If you want to change the arrangement or need to clean the tiles before the autumn and winter period, you can very quickly disassemble individual elements and move them to the right place or hide them.

How to Clean Your Deck Tiles?

1. **Wipe down the wood with a soft cloth slightly moistened with warm water soapy water.** Dry with a soft dry cloth or air drying is fine.
If necessary, sand the surface with fine sandpaper. Flush and leave to dry thoroughly.
2. **Avoid cleaning tools with a rough surface.**
3. **Don't use detergents or cleaners that have silicone or ammonia in them,** as that can dry out the wood and cause cracking.
4. **For an even more natural solution, try a mixture of water and white vinegar** to remove tougher stains like bird droppings, mould and mildew.

The wooden deck tiles are made of natural Acacia Hardwood. Acacia wood texture is naturally fine and smooth and much more resistant to scratches than other timbers. Acacia wood will react to weather conditions, Although pretreated with hard-wax oil at the factory, the deck tiles may swell or dry out if exposed to snow, rain and sun, resulting in the formation of cracks.

How to Care Your Deck Tiles?

1. Prior to installation, it is recommended to apply at least two coats of an exterior-grade wood sealant, to the deck tiles, on all surfaces, in order to protect the wood finish and also to protect the wood from weatherization.
2. In daily use, try to keep the deck tiles clean and dry. If the deck tiles have been sitting outdoors for some time, clean them well before reapplication of a wood sealant.

3. Boiled linseed oil or tung oil is often used in commercial goods as the base ingredient for oiling outdoor wood furniture for its natural drying properties.
4. You can also use wax like Glitz furniture wax, furniture oil like Cabots Furniture Oil. Using wax creates a harder finish and lasts longer.
5. Oiling or waxing twice a year to maintain your acacia wood in top condition.

How to Store Your Deck Tiles?

When not using the deck tiles for some time, lift them up so that water can easily run off the surface. When the outdoor season is over, store the deck tiles in a cool place indoors or protect them from the elements to retain their good condition.

HOW DO I GET SERVICE?

Any problem, whether it's a missing part or a damaged product if you need a replacement or return a package, please contact us by email, we will provide a replacement for free or prepaid return label. Please include a brief description of the problem and photos of the damaged product in your email.
