

# Solid Vinyl Screen Door Tips & Information

## FEATURE

### Cuts Just Like Wood

The vinyl material retains the workability of wood. Trim using a standard circular saw.

## TIP

### Durable & Easy to Clean

Nothing fights the elements like a solid vinyl screen door. No painting or sealing required. Simply clean with standard household cleaner and your door will stay looking new.

## FEATURE

### Simple Rescreening

If you need to tighten or replace the screen, simply use .175 spline and fiberglass screen.

## FEATURE

### Welded Joints

The corners of your doors are welded together to prevent sagging.

## TIP

### No Painting Required

PVC materials are paintable. However, the nature of this door is not favorable for painting and will void the warranty.

## TIP

### Install a Door Closer or Catch

There are several products you can buy separately to control the movement of your door.

#### *Pneumatic Door Closer*

Enables smooth closing movement and can hold the door open in various positions. Mounts to the top or bottom rail of your door.

#### *Spring-Loaded Screen Door Catch*

Catches the door as it closes and keeps the door in the closed position.

## TIP

### Install a Door Sweep

A door sweep (sold separately) covers the gap between the bottom of your door and floor to keep bugs from sneaking through.

## TIP

### Buy Replacement Parts Online

If you need to replace any part of your door, simply visit [ScreenTight.com](https://www.screentight.com).
