

## Shower Door Maintenance Manual

### 1. Cleaning:

① When cleaning the stainless steel frame, glass and hardware accessories of the shower door, please use a soft cloth. If there is slight dirt, please use a soft cloth or sponge dipped in "neutral detergent" for cleaning. After removing the stubborn dirt, please rinse with plenty of water to prevent the cleaning agent from remaining on the surface of the shower door and causing corrosion damage.

② When using the special detergent and cleaning agent for bathroom, please be sure to use it correctly according to the precautions described in the detergent. Incorrect use will cause the product to have some bad conditions, such as paint peeling, color fading, rust, tarnishing, etc.

③ Do not use the following items for cleaning: acid, alkaline solvents, medicines (such as hydrochloric acid), solvents containing bleach, acetone diluent, detergent powder, toilet cleaner, Tianna water, etc., otherwise the product will be damaged. There are some bad conditions, such as paint peeling, discoloration, rust, tarnishing, etc.

④ The cleaning items that can be used for the product are: soft cloth, toothbrush, neutral detergent, a mixture of diluted vinegar and salt. Note: any cleaning agent will have a certain impact on the surface of the product, so use caution. Rinse with clean water in time to prevent damage to the surface caused by the residual detergent.

### 2. How to use and maintain the pulley of the shower door:

① Avoid hitting the movable door with force, so as not to cause the movable door to fall off.

② Pay attention to regularly clean the slide rails, pulleys and sliders, and add lubricant (lubricating oil or lubricating wax).

③ Regularly adjust the fixing screws of the pulley to ensure the effective bearing and good sliding of the pulley on the movable door.

### 3. Maintenance of tempered glass:

① Do not hit or hit the glass surface with sharp objects to avoid damage.

② Do not wipe the glass surface with rough objects to avoid scratches.

③ After using for a period of time, the glass will remain dirt, remove the dirt on the glass, you can use a mixture of cool and salt to wash with a toothbrush, you can remove the stains. Pay attention to rinse with clean water in time after use.
