Large sensor pad on back allows for damage-free pinless testing

- Large, easy-to-read digits tell you immediately the moisture content
- LCD features white LED backlighting for easy visibility in low light areas
- Ideal for measuring moisture content in lumber, firewood, brick, concrete, drywall, flooring and plaster
- Protective Cover: Keeps test pins clean and prevents injury
- Accuracy: +/- 3%
- Measuring Range: Pin mode - 5% - 50% (wood); 1% - 33% (other building materials); Pinless mode - 0.1 - 100% for all materials
- Stainless steel test pins are replaceable
- Auto Power off: 3 minutes
- 1-year warranty

Sensor Pad

The **AccuMASTER Duo Pro™ Pin and Pinless Moisture Meter** is ideal for measuring moisture content in hardwood, lumber, firewood, drywall, plaster, brick and concrete before you begin work. With the **AccuMASTER Duo Pro™** you'll always know you're selecting dry lumber when buying wood for building a project or selecting firewood for burning. You can also use the meter to help locate water leaks hidden behind ceilings, walls and under floors.
