

Q&A

Q: Is the Planket frost cover washable?

A: The Planket can be easily washed with a water hose and then air-dried. While machine washing is not recommended, some users have reported that washing with cold water on a gentle cycle may also clean the Planket.

Q: Is the Planket frost cover waterproof?

A: The Planket is made from a water resistant, breathable fabric. Unlike sheets or blankets that will soak up water and potentially damage tender plants by crushing them, rain and/or sleet will bead up and roll off the Planket. The Planket will become wet, but never heavy.

Q: Against what temperature does the Planket frost cover protect plants?

A: Unfortunately, there are too many variables to provide an exact temperature. Variables include not only the air temperature, but also the wind chill, the humidity and the inherent resistance to cold of the particular plant.

Q: Does the Planket frost cover create heat?

A: No, but the Planket will retain heat from the surrounding soil to help protect plants from frost damage.

Q: How long can the Planket frost cover be left on my plants?

A: All plants require sunlight and while each plant is different, they should all receive as much time in the sun as possible. It is important that the Planket covers be removed once the sun comes out and the temperature is above freezing; otherwise, the plants may fall victim to excess heat.

Q: Is it ok to leave the Planket on for weeks at a time?

A: No, the Planket is effective for short periods of frost and light freezes only.

Q: Are there any other suggestions to protect my plants from frost damage?

A: Stringing incandescent mini Christmas lights around the plant before covering with the Planket frost cover has been reported as being a successful source of warmth, as incandescent light bulbs emit a slight amount of heat. It is important that incandescent mini lights, rather than LED lights are used, since LED lights do not generate heat.

FOR BEST RESULTS

Water the plants thoroughly before covering.

For easiest application, partially cinch (6 ft., 8 ft. and 10 ft. only) the cover before placing over the plant. Unless the plant is dormant, do not leave on for extended periods of time, as the Planket® will prevent crucial sunlight from reaching the plant, which may damage the plant.

For potted plants, tighten the cinch as low as possible around the pot. For in-ground plants, tighten the cinch around the base of the plant as close to the soil as possible or secure to the ground by inserting stakes (sold separately) or cord through the grommets in the Planket®.

NOTE

The effectiveness of the Planket® can vary depending on weather conditions and the cold tolerance of the plant. the Planket® is only intended to help plants during frosts and light freezes, and there is no guarantee the Planket® will protect plants in all circumstances.

LIMITED WARRANTY

As an expression of our confidence in the quality and workmanship of our products, Brainchild, Inc. warrants its products to be free from defects in materials and workmanship during normal use by the original purchaser of the product. If a Brainchild, Inc. product proves defective in materials and workmanship, Brainchild, Inc. will arrange for replacement. To receive replacement, either return the defective product to the original place of purchase along with the original purchase receipt or contact our Customer Service Department at 469-334-3444 for return/replacement instructions. This warranty does not cover problems arising from normal wear, product abuse, modification, failure to adhere to the accompanying instructions, improper operation, misuse, or use other than for personal, family or household purposes and excludes shipping and handling charges. BRAINCHILD, INC. SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES WHATSOEVER. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.
