

**Thank you** for your purchase and for believing in us to make your special delivery. To care for your new Deco Blooms arrangement, please follow these easy care steps:

**1. Water:**

Every 7 to 10 days

Keep moderately moist soil.

Use room temperature water to mist orchids in the morning, it helps to raise humidity. Allow the soil to drain so that the roots are not suspended in water. This will cause the roots to rot killing the plant.

**2. Light & Location:**

Orchids love bright filtered light. Generally away from a window. "DO NOT PLACE DIRECTLY IN THE SUN" Direct sun light will burn the orchid causing it to die.

**3. Temperature:**

Orchids are happiest in a humid area that is 59F to 79F / 15C to 26C

**4. Fertilize:**

Use a liquid fertilizer once per month. We use water soluble Better Grow fertilizer and have great results.

Your opinion and experience matters to us: If you are not completely satisfied with your arrangement, please let us know.
