monkey tail cactus

MONKEY TAIL CACTUS
Cleistocactus colademononis

Like other succulents and cacti, this plant is a breeze to care for. It thrives in bright, indirect sunlight and only requires occasional watering. Its hardy nature means it's the perfect plant for both novice and experienced plant enthusiasts.

LIGHT

Filtered, bright light.

WATER

Water modestly when soil is completely dry and allow excess to drain.

TEMPERATURE

60° - 80° F

FERTILIZER

Fertilize once a year with balanced fertilizer during growing season.
