

# A PREMIUM-QUALITY PVC COVER FOR DECKS & DOCKS

Attaches Easily to Protect & Beautify Your Pre-Existing Structure

## ABOUT US

Deck-Top combines comfort and durability in an easy-to-install, easy-to-maintain, cost-effective product that is most importantly, environmentally friendly. Our goal here at Deck-Top is to have fun while working hard to provide our customers with a superior product that will improve and enhance their lives through the enjoyment of the outdoors.

We hope you enjoy Deck-Top as much as we do!

Sincerely, The Deck-Top Team

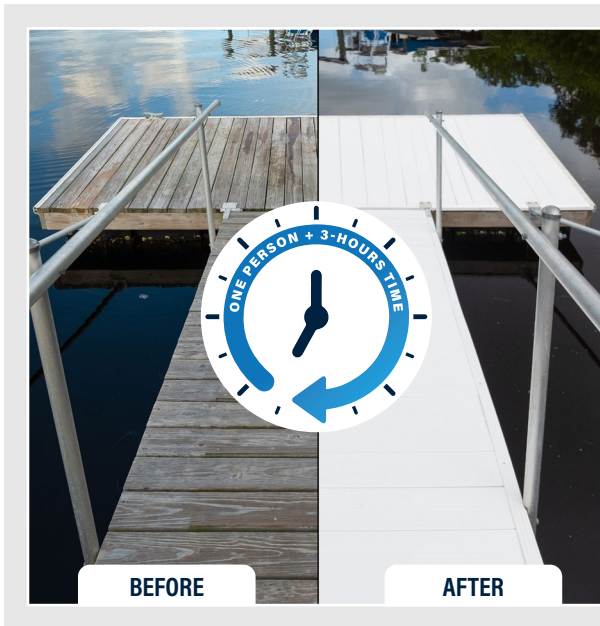

Steve & Cindy Byrd || Jeff & Terri McIntyre

## DON'T REPLACE YOUR OLD DECK, REFACE IT WITH OUR EASY-TO-INSTALL SOLUTION

Deck-Top is an innovative, patented, and one-of-a-kind PVC deck cover that beautifies and dramatically extends the lifespan of new and pre-existing wood or composite decks and docks.

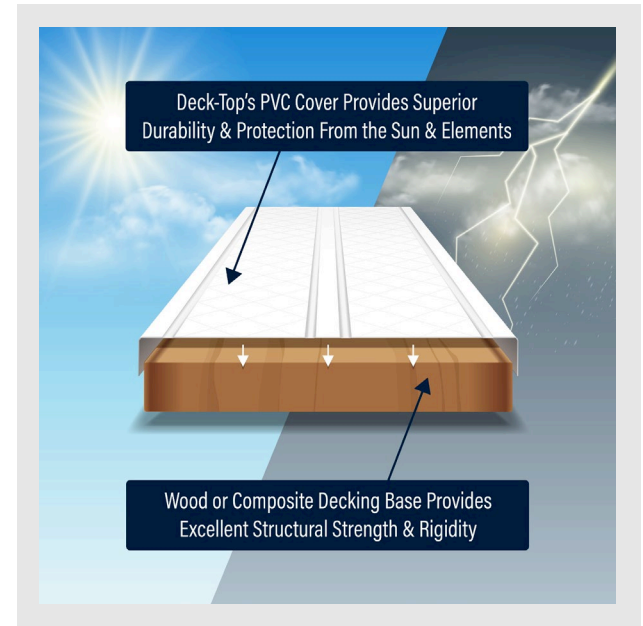

What's more, Deck-Top is very easy to install; the installation example shown here was for an 8ft. x 12ft. floating dock with a 3ft. x 12ft. walkway and it was completed by one person in roughly 3-hours!

Easy installation, low-maintenance, and "cool to the touch" technology make Deck-Top an ideal solution for a variety of applications. Why replace your old deck when you can cover and protect it for a fraction of the cost?

## DECK-TOP JOINS THE DURABILITY OF PVC WITH THE STRENGTH OF WOOD OR COMPOSITE

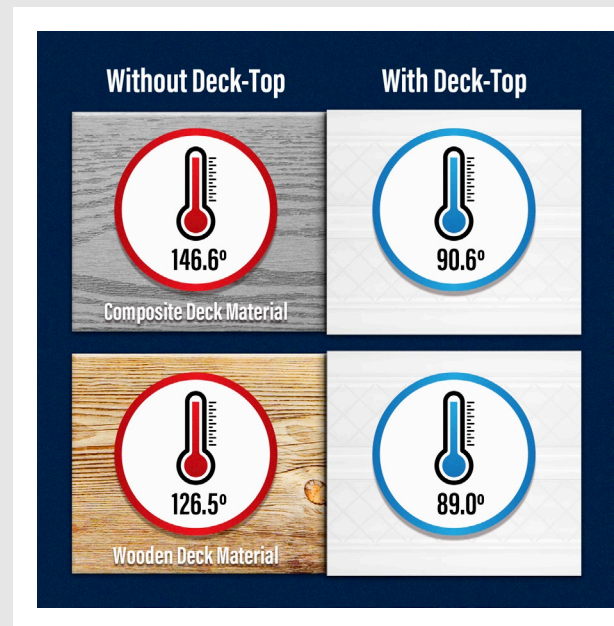

Deck-Top offers what other PVC products do not: a single piece that caps and protects the existing board underneath that protects your structure while allowing it to breathe and wick moisture. Our advanced system will fit easily on any 5/4" x 6", or 2" x 6" decking boards in either wood or composite materials. Deck-Top is engineered to allow wood or composites and PVC to perform in harmony with each other by combining the best features of both.

Deck-Top PVC decking products and recommended glues have been professionally tested to ensure complete adherence in hot humid and cold weather climates. With the proper adhesive, Deck-Top will bond to structurally sound wood or composite materials - even when your structure is weathered or aged in appearance.

## DECK-TOP'S SURFACE IS 30° - 50° COOLER WHEN COMPARED TO SIMILAR PRODUCTS

One of the worst parts of deck ownership is walking barefoot on a hot deck surface. Deck-Top provides a unique surface that is always cool on your feet, even in direct sunlight. Deck-Top is made with special agents called "heat stabilizers" that join together with PVC compounds to prevent the heat-caused degradation of plastics. Besides staying cool, these additives prevent any material breakdown that would normally be caused by nature's elements.

## CONCERNED ABOUT MOISTURE & WOOD ROT?

Deck-Top is frequently asked, "Will Deck-Top trap moisture and rot my wood?" The answer is simply no, and here's a picture to prove it! This picture shows what a piece of 5/4" treated wood looks like after being covered with PVC for over 10 years. Notice how the wood shows no signs of splitting, cracking, or rotting? That's because Deck-Top protects your wood from the true source of decay - the sun. The sun's harmful UVA and UVB rays can wreak havoc on wooden structures, but when covered with PVC, your deck or dock's lifespan is significantly extended.

If you're still concerned about damage from trapped moisture, just know that Deck-Top is also designed with special spacing to mitigate any potentially trapped moisture. As moisture collects under Deck-Top, moisture migration will occur naturally via cellular respiration on key areas not covered by Deck-Top; namely from the sides, ends, and undersides of the planks. This ensures that moisture will not get trapped in between the planks and cause damage or wood rot to your understructure.

### DECK-TOP'S KEY BENEFITS & FEATURES:

#### Protects Your Investment

Dramatically Extends the Life of 2" x 6" or 5/4" x 6" Flooring

#### Very Low-Maintenance:

Requires Very Little Upkeep, Cleaning, or Care

#### Stays Cool to the Touch:

Surface Stays Cool, Regardless of Outdoor Temperature

#### Stain-Resistant:

PVC Material is Resistant to All Types of Stains

#### UV-Resistant:

Protects Against Damage from UVA & UVB Rays

#### Slip-Resistant:

Our Tread Patterns are Professionally Tested and Rated as "Low Probability" for Slips & Falls

### DECK-TOP'S ADDITIONAL BENEFITS & FEATURES:

- ✓ **LIMITED LIFETIME WARRANTY:** Limited Lifetime Warranty on Residential Properties & 25-Year Warranty on Commercial Applications
- ✓ **REFACES & BEAUTIFIES OLD DECKS:** Makes Existing Structures Match New Ones, No Need to Remove or Reframe Existing Decking
- ✓ **ENVIRONMENTALLY FRIENDLY:** Eliminates the Need for Chemical-Based Deck Maintenance Such as Cleaners, Paints, or Wood Stains
- ✓ **AVAILABLE IN A VARIETY OF LENGTHS:** Deck-Top is Available in Lengths of 4 ft. up to 24 ft.
- ✓ **EASILY CLEANED & DISINFECTED:** Unlike Other Materials, Deck-Top's Non-Porous PVC Material Can Withstand Repeated Doses of Disinfectants.
- ✓ **FDA APPROVED:** Our Non-Porous Virgin PVC is FDA Compliant and Naturally Resistant to Biological Contaminants (COVID-19, E. Coli, MRSA).
