1.1 Gal Home Water Distiller

0.3 Gal/H Distilling Speed & Temp/Time Setting & Glass Container

• VEVOR's water distiller with an upgraded panel is a perfect tool for purifying your water and helping you get a constant supply of distilled water, whether you're at home or in the office. This distiller can effectively dissolve VOCs and filter other impurities, and the distilling speed reaches up to 0.3 Gal (1 L) of water per hour. What's more, as an ideal match for a tiny kitchen, it is not much bigger than a kettle in size and won't take up so much of your space.

• Efficient Water Purification

• Upgraded Timing Function

• Precise Temperature Display

• Selected Materials & Fast Heat Dissipation

• User-Friendly Accessories

Constant-Temp Fermentation

The upgraded time setting function and the traditional temperature control are perfect for constant-temp fermentation, allowing you to distill alcohol, hydrosol and essential oil with this machine.

Dry-Burning Protection

When the temperature exceeds 115°C, the machine will stop heating. And it will automatically shut off when the internal temperature is over 150°C. Dual protection safeguards your daily operation.

Efficient Cooling System

The four-blade fan on the top adopts light-weight aluminum material, and the condensing coil in the exhaust cap is made of 304 stainless steel. A reliable heat dissipation effect can be ensured.

4 Steps to Activate the Carbon Filter

Improve taste & odor of water after removing chemical contaminants.

Specifications

Voltage	110V/60Hz
Power	750W
Distilling Speed	0.3 Gal/H (1 L/H)
Temperature Range	86-226.4°F (30-108°C)
Timing Range	0-99 H
Barrel Material	304 Stainless Steel
Carafe Material	Borosilicate Glass
Barrel Capacity	1.1 Gal (4 L)
Carafe Capacity	1.1 Gal (4 L)
Carafe Weight	2.27 lbs (1.03 kg)
Machine Weight	7.3 lbs (3.3 kg)
