BioGasket™

As the demand for the use of cleaner-burning biofuels in residential home heating systems

increases, General Filters offers a complete line of oil filters and replacement cartridges that includes our trademarked BioGasket™! Made from FKM (fluoroelastomer synthetic material), our BioGasket™ is rated for fuel blends up to B100 and can accommodate home heating systems utilizing biofuel.

All of our residential fuel oil filter brands offer products with the BioGasket™:

- General: General branded oil filters come standard with the BioGasket™.
- Gar-Ber: This line of spin-on oil filters feature a number of filters and cartridges with the BioGasket™.
- Unifilter®: Replacement cartridges with BioGasket™ are available for this brand.

General Filters, first and foremost in residential oil heating filtration equipment, is your bio fuel filter expert! See our specifications on the Back Page.

BIOGasket™ the FKM Oil Filter Head Gasket

Use only genuine General Filters replacement parts with General Filters products!

When it's most important, trust in General Filters oil filter products, with BioGasket™ to keep your home furnace running smoothly.

Protect those you love with General and Gar-Ber brand oil filters, with BioGasket™.

REPLACEMENT PARTS AND ACCESSORIES

[illegible]

Also known as Viton®, Type 1 Fluoroelastomer. The BioGasket™ provides excellent resistance to petroleum oils, inorganic acids, organic acids, fuel hydrocarbons, animal and vegetable oils, mineral oils and solvents. BioGasket™ also has excellent heat resistance, making service temperatures nearing 500°F / 150°C possible. The General Filters BioGasket™ is ETL Listed for all fuel oils and biodiesel fuel blends up to B100.

Nitrile rubber gaskets provides excellent resistance to petroleum oils, mineral oils, solvents, and biodiesel fuel blends up to B20. Temperature up to 212°F / 100°C.

Vellumoid is a treated cellulose fiber impregnated with protein glue and glycerin binder. It is used for specialty chemicals. Temperature up to 250°F / 120°C. Not recommended for petroleum oils.
