

The Care and Cleaning of Vinyl Fencing & Railing

1. What is the best way to remove normal dirt and debris from my vinyl fencing or railing?

Not only is vinyl durable, it's low maintenance. The water from seasonal rain showers is typically sufficient to keep vinyl fencing and railing clean. If a more thorough cleaning is necessary, fill a bucket with hot water and dish soap and wipe the vinyl down with a rag. It is best to start at the bottom and work your way up to reduce streaking.

Tip: For the best results, it is best to choose an overcast and cool day (55°-75°).

2. Can I use a power washer on my vinyl fencing and railing?

Yes, using a power washer is often the quickest way to clean vinyl.

3. Is there a cleaning solution I can use on hard-to-remove dirt or mildew?

For hard-to-remove dirt, such as soot and grime found in industrial areas, wipe the fencing or railing down with a solution consisting of:

- a. 1/3 cup powdered detergent (such as Tide, All or Gain)
- b. 2/3 cup of household cleaner (such as Simple Green or Lysol)
- c. 1 gallon of water

Important information when using a cleaning solution:

If cleaning your vinyl with either of the solutions above:

1. Be sure to thoroughly rinse the entire surface with fresh water from a garden hose immediately after washing, before the solution dries.
2. Be sure to accurately mix the solution using the measurements noted. Greater concentrations of chemicals may cause damage to the finish of the vinyl fencing and railing.
