LOCTITE

CAULK & SEALANTS IDEAL FOR FINISHING & SEALING

Common Projects

Exterior Projects

- Exterior sealants must be able to withstand extreme weather conditions and sunlight to provide a long lasting seal.

Window & Door

- Window & door sealants must be flexible to shift with the structure without cracking.

Multi-Purpose

- Multi-Purpose sealants must be weather resistant while also being low odor and paintable for indoor use.

Kitchen & Bath

- Kitchen & Bath sealants must be easy to apply and clean up while being low odor for indoor use.

Paint & Trim

- Paint & Trim sealants are paintable and easy to clean up to blend in seamlessly with interior trim.

Guide

FORMULA TYPES

LATEX - Easy to apply and clean up. Fast curing. Low odor, not suitable for extreme temperatures or direct sunlight. Ideal for indoor use.

SILICONE - Permanently flexible and shrink resistant in all conditions. Solvent clean up, not paintable. Adheres best to non-porous surfaces.

SOLVENT - Weather resistant and strong final adhesion. Strong odor and tougher to apply, ideal for outdoor use.

POLYURETHANE - Strong adhesion to most surfaces, good flexibility and weather resistance. Poor UV resistance.

POLYMERS/HYBRID - Weather and UV resistant, low odor. Great for indoor or outdoor use.
