UTILITY HAND PUMPS

GENERAL INFORMATION

Jabsco hand pumps. Pump more liquid with less effort! They never need coaxing or priming and give full suction on the first stroke. Pumps can be used in any position.

Uses include bilge pumping, oil draining, diesel fuel transfer, and many other liquid transfer applications. NOTE: Oil temperature should not exceed 140° F.

Long life brass cylinders, high-quality oil resistant plungers, intake and discharge caps are used. Some models include hose(s) or adjustable mounting brackets. Available in two sizes with 1-3/4" and 1-1/4" diameter cylinders.

MAINTENANCE

PUMPS USED IN DIESEL FUEL APPLICATIONS MUST BE FLUSHED CLEAN AFTER USE TO PREVENT NEOPRENE PART DISTORTION.

To disassemble pump for cleaning and repair, pull handle out approximately 4" and place screwdriver carefully under bottom of spout cap and over outside of cylinder roll. Lift up on screwdriver and pry off spout cap. Pull out plunger shaft assembly. Lift full floating plunger off seat and clean between cup and seat. Remove intake cap in same way as spout cap. Take disc valve from cylinder and clean under neoprene flapper. Run rag through

cylinder for cleaning. To reassemble pump, place disc valve in cylinder, snap intake cap back onto cylinder being sure undercut in cap is over cylinder roll. Insert plunger shaft assembly into cylinder and snap spout cap over cylinder roll.

Oil pump internally and coat exterior of brass cylinder with corrosion inhibitor or light oil for storage.

	WARNING
	Explosion hazard. Do not pump gasoline, solvents, thinners or other flammable liquids. To do so can cause an explosion resulting in injury or death.
