

How to test all SmartlockPro® GFCIs

1. Plug a lamp or radio into the GFCI receptacle and turn ON the lamp or radio.

2. Push the TEST button on the GFCI. The GFCI will trip and power to the lamp or radio will be cut OFF.

3. Your GFCI is working properly only if you can push the RESET button on the SmartlockPro GFCI to restore power to the lamp or radio.

Takes up to 25% less space in the wallbox vs. other GFCIs

Typical GFCI

SmartlockPro® Slim GFCI

Slim profile GFCI

- Reduced depth makes it easier to install in any electrical box, even shallow ones
- Saves time on the job
- Only 1.026" protrusion into wallbox
- Terminals allow for easy wiring options – back and side wire capable
- External back wire clamps provide visual indication of proper clamping
- Brass self-grounding clips

Get the Most Advanced Protection and Fastest Installation with SmartlockPro® Slim GFCIs

- Meets or exceeds the latest UL requirements
- UL Standard 943 Class A (GFCI) and 498 (Receptacles)
- Backed by Leviton's Limited Two-Year Warranty

SmartlockPro Slim GFCI receptacles are available in 15A and 20A versions in White, Ivory, Light Almond, Gray, Black or Brown.

Color selection varies by model.

New, Easy-Install SmartlockPro® Slim GFCIs – The Smart Choice

Tamper-Resistant models meet child safety requirements of the latest National Electrical Code®.

Important Reminder:

GFCIs can become damaged over time. They must be tested monthly to ensure they are providing protection.

SmartlockPro® Slim GFCI Receptacles save space in the wallbox

If you've ever installed a GFCI, you know that device size matters. New SmartlockPro GFCIs sport the slimmest profile on the market for an easy fit into any electrical box. The combination of smaller size, enhanced wiring features and superior reset lockout protection make SmartlockPro Slim GFCIs ideal for upgrades, remodels or new installations. Plus, with so many models to choose from – Standard, Tamper-Resistant, Duplex Guide Light, Self-Test, Weather-Resistant, Blank Face – it's easy to find the perfect solution for both residential and commercial settings.

The SmartlockPro® Protection Advantage

Patented Reset Lockout

The Reset Lockout feature provides an end-of-life indication and prevents reset if a SmartlockPro GFCI is damaged so that it cannot respond to a ground fault. Competitive GFCIs may allow reset even if they are no longer providing protection. The SmartlockPro RESET button will not engage if:

- The GFCI is miswired due to reversal of the line and load leads
 - Delivery of power to feed-through terminal and face will be blocked
- There is no power being supplied to the GFCI
- The GFCI cannot pass its internal test

LED Indicator for Line-Load Reversal*

If a SmartlockPro GFCI is miswired during installation (line-load reversal) it cannot be reset. The green LED will be ON to indicate a line-load reversal. Once the GFCI is properly wired and can be reset, the LED acts as a power indicator that remains ON as long as the GFCI is operating correctly and providing power. Unlike some other designs that employ a one-time feature, Leviton's line-load reversal protection is not lost or disabled after initial installation.

The National Electrical Code® requires the installation of GFCIs in the following areas of the home:

- Kitchens
- Bathrooms
- Laundry Rooms
- Workshops
- Basements
- Garages/Carports
- Pool Areas

It also requires that receptacles installed in new and renovated residential construction be tamper-resistant.

*Self-test indicators may differ. Refer to instruction sheet.

SmartlockPro Slim GFCI Receptacle with LED Indicator

15A-125V@ Receptacle	20A-125V@ Receptacle
20A-125V Feed-Through	20A-125V Feed-Through
Cat. No. X7599 (TR)	Cat. No. X7899 (TR)
Cat. No. N7599 (NTR)	Cat. No. N7899 (NTR)

All the superior features of our GFCI receptacles but in a slimmer, easy-to-install unit offering ample wiring space in the wallbox.

- Dual function LED offers indication of line/load reversal and power availability

SmartlockPro Slim GFCI/Duplex Guide Light

15A-125V@ Receptacle	20A-125V@ Receptacle
20A-125V Feed-Through	20A-125V Feed-Through
Cat. No. X7592 (TR)	Cat. No. X7892 (TR)

All the robust features of the SmartlockPro Slim GFCI with the added benefit of dual LED guide lights without losing outlet space.

- Sensor provides automatic guide light ON/OFF function based on ambient lighting
- Unique lens design with edge-mounted LEDs improve light dispersion

SmartlockPro Slim Self-Test GFCI

15A-125V@ Receptacle	20A-125V@ Receptacle
20A-125V Feed-Through	20A-125V Feed-Through
Cat. No. S7599 (TR)	Cat. No. S7899 (TR)

A GFCI that performs a self-test every 15 minutes to confirm that protected power is available – now that's smart!

- Two status indicator lights and an audible tone signal GFCI protection status

SmartlockPro Slim Weather-Resistant GFCI

15A-125V@ Receptacle	20A-125V@ Receptacle
20A-125V Feed-Through	20A-125V Feed-Through
Cat. No. WT599 (TR)	Cat. No. WT899 (TR)
Cat. No. WR599 (NTR)	Cat. No. WR899 (NTR)

Designed for wet and damp locations to meet the requirements of NEC Section 406.8. All the great features of SmartlockPro plus:

- Conformal coated PC board protects critical components from moisture
- Stainless steel strap and screws, UV stabilized plastics and cold impact resistance face and buttons ensure quality that lasts

SmartlockPro Slim Blank Face GFCI with LED Indicator Light

20A-125V Feed-Through
Cat. No. 7590

When downstream protection is a priority this GFCI provides the necessary safeguards with a clean appearance that blends into the wall space.

(TR) = Tamper-Resistant
(NTR) = Non-Tamper-Resistant
