

Outdoor Aluminum Chaise Lounge (Set of 2) - Use and Care Manual

1. Important Safety Instructions

- **Weight Limit:** Do not exceed the maximum weight capacity of [specify weight, e.g., 600 lbs per lounge chair.
- **Stability Check:** Before use, ensure the chair is placed on a flat, level surface to prevent tipping. Avoid uneven terrain, slopes, or soft ground (e.g., sand, mud) that may cause instability.
- **Proper Positioning:** Never stand, jump, or kneel on the chair. Use the lounge only in its intended reclined or upright positions; do not modify or force parts beyond their designed range of motion.
- **Weather Safety:** Do not use the chair during extreme weather conditions (e.g., strong winds, heavy rain, snow, or lightning). High winds may tip the chair, and prolonged exposure to moisture can damage components.
- **Assembly Caution:** Follow all assembly instructions carefully. Tighten all screws and bolts securely to prevent loosening during use. Check hardware periodically for tightness.

2. Assembly Instructions

Tools Required: Phillips-head screwdriver (not included) or power drill with Phillips bit.

1. **Unpack Contents:** Remove all parts from the packaging. Identify components: 2 lounge frames, 2 seat slings, [number] screws, [number] washers, and [number] nuts (if applicable).
2. **Attach Legs/Frame:** Align the leg brackets with the pre-drilled holes on the main frame. Insert screws through the washers and tighten firmly using a screwdriver. Repeat for all legs.
3. **Install Seat Sling:** Stretch the seat sling over the frame, ensuring the fabric is centered. Secure the sling to the frame using the provided clips or screws at each corner, pulling gently to remove slack.
4. **Recline Mechanism (if applicable):** Test the recline function by adjusting the backrest to desired positions. Ensure the locking mechanism (e.g., pins, levers) engages securely to hold the backrest in place.

Note: Do not over-tighten screws, as this may strip threads or damage the aluminum frame.

3. Proper Use Guidelines

- **Recline Adjustment:** To adjust the backrest, release the locking mechanism (e.g., pull the lever, lift the pin) and tilt the backrest to your preferred angle. Engage the lock fully before sitting to prevent sudden movement.
- **Seat Care:** Avoid placing sharp objects (e.g., tools, pet claws) or heavy items on the seat sling, as they may tear the fabric. Use a cushion or towel for added comfort, ensuring it does not interfere with the recline mechanism.
- **Moving the Chair:** Lift the chair from the frame (not the seat sling) when repositioning to avoid stretching or damaging the fabric. Do not drag the chair across rough surfaces, as this may scratch the aluminum legs.
- **Child Safety:** Keep children supervised when using the lounge. Do not allow children to climb or play on the chair, as this increases the risk of falls or structural damage.

4. Cleaning and Maintenance

Aluminum Frame

- **Regular Cleaning:** Wipe the frame with a soft, damp cloth to remove dust, dirt, or pollen. For stubborn stains (e.g., bird droppings, tree sap), mix mild soap with warm water and gently scrub with a non-abrasive sponge. Rinse thoroughly with clean water and dry with a towel to prevent water spots.
- **Rust Prevention:** Aluminum is naturally rust-resistant, but exposure to saltwater (e.g., coastal areas) or harsh chemicals (e.g., pool chlorine, fertilizers) may cause discoloration. Rinse the frame with fresh water after exposure to salt or chemicals, and dry immediately.

Seat Sling (Fabric)

- **Routine Cleaning:** Vacuum or brush off loose debris. For light stains, spot-clean with a solution of mild detergent and water, using a soft brush. Rinse with a hose and air-dry completely.
- **Deep Cleaning:** Remove the seat sling (if detachable) and machine-wash in cold water on a gentle cycle with mild detergent. Do not use bleach or fabric softeners. Hang to dry; do not tumble dry, as high heat may shrink or damage the fabric.
- **Mold/Mildew Prevention:** Ensure the seat sling is completely dry before storing. Avoid leaving the chair in standing water or shaded, damp areas for extended periods.
