# CUSTOM DOOR & MIRROR

## MAINTENANCE

Door hinges and rollers should be sprayed every 6 months. For best results use a Silicon or Teflon based lubricant. Use spray very sparingly, a very little goes a long way. You will be surprised at how well the doors will operate with a little lubricant.

## CLEANING OF MIRROR

The most important thing to know about cleaning mirror is to use an alcohol based cleaner. DO NOT USE AN AMMONIA BASED PRODUCT.

It is also best to spray the cleaner onto the cloth or paper towel and not the mirror. Lint free rags will work best but are certainly not necessary.
