1 Clean the Wall Surface

Use a scrub sponge and TSP cleaner to remove power & stains, make sure the wall is clean, flat and dry.

2 Measure & Plan

Measure your wall to determine the quantity of tiles to finish your project; draw the guidelines with a level and chalk to ensure the right installation.

3 Cut the Tile

Cut the jagged side of the first tile to create a straight edge. Start from the corner and cut with scissors or a utility knife.

4 Align & Interlock

Peel off the backing paper and align the tiles carefully. Stick them onto the wall one by one in the same direction, press it firmly once confirmed.

5 Sharp & Pointed Edges

Please note that the design of the peel & stick backsplash tile's end is pointed, so please do take care when installation.
