

Pool Time™ Phosphate Remover is specially formulated to remove phosphate and other contaminants, which are often too small to be caught on your filter. Pool Time Phosphate Remover binds to these impurities and makes them large enough to be filtered out of the pool. Removing these contaminants helps keep your pool water clean and the pool operating efficiently to deliver clear and inviting water.

DIRECTIONS FOR USE: Read entire label and use strictly in accordance with precautionary statements and directions.

FOR CLOUDY WATER OR REMOVAL OF PHOSPHATE: Removes up to 1000 ppb of phosphate when added per label directions.

- Test and balance water before using this product. Visit www.pooltime.com for complete pool balancing instructions.
- Make sure all pool equipment is working properly, including pump, filter, skimmer and heater. Backwash pool filter following manufacturer's directions.
- Apply 1 quart of Phosphate Remover per 10,000 gallons of pool water directly to water around the edges of the pool*.
- Allow the pump and filter to run continuously for 24-48 hours.**
- After 48 hours, backwash and rinse the filter according to the manufacturer's instructions.

* Water may cloud upon application but will clear within 48 hrs.

** If the filter pressure increases 8-10 psi above normal operating pressure, backwash and rinse filter accordingly.

MAINTENANCE DOSE: To keep your water clear, apply Pool Time Phosphate Remover weekly at a rate of 2 fl oz per 5,000 gallons of pool water.
