

TIDY POTS SOIL SCOOP

INSTRUCTIONS:

Grasp your Tidy Pots Soil Scoop with either hand, resting your thumb on the recessed area.

Scoop up potting soils or other loose materials.

Hold your soil-filled scoop horizontally, then set on the inside edge of the pot or hole to be filled.

Tilt your scoop to allow soil to pour neatly into the pot or hole, then pull scoop upward and away.

Turn your Tidy Pots Soil Scoop upside down so the wider lip is at the bottom. Then use the lip to tamp down and compact deposited soil into pots or holes.
