Easy Access
Washable Air Filter
Helps catch unwanted dust particles from the air extending long term efficiency and inner component cleanliness

Digital Control Panel & Remote Control

Quick & Easy Installation
Easy-to-install window venting kit includes adjustable window bracket & all materials needed to set up and use the air conditioner quickly

FEATURES & BENEFITS

4-in-1
Cooling, Heating, Dehumidification, Fan

Dehumidification Capacity
86 pints/24 hours (40.7 litres/24 hours)*

Powerful Air Flow
265 CFM (450 m³/hr)*

Adjustable Temperature
61°F to 89°F (16°C to 32°C)

Feather Touch Controls

Product Dimensions (in) 19.9 (W) 16.8 (D) 34 (H)

Net Weight 75 lbs / 34 kg

* All specifications mentioned are under test conditions, actual performance depends on ambient conditions. Specifications may vary in different countries and subject to change without prior notice.

* Except in very high humidity conditions.

* In October 2017, the Department of Energy implemented a new test procedure which takes different factors into account and generates a lower BTU rating of portable air conditioners to indicate capacity. However, the actual capacity has not changed—the difference is simply due to the different test procedure. There have been no internal changes to these units, and the functionality remains the same. Please refer to room size guidelines to find the portable air conditioner that best meets your needs. Please also refer to the Aham website.
