Pre-Installation

PLANNING INSTALLATION

Ensure all parts listed in the Package Contents section are included and that you have the listed Tools Required on hand. If any part is missing or damaged, contact customer service.

When planning your installation, ensure the hinge is oriented in its final position as shown. This hinge is intended for overlay applications on furniture with the doors positioned outside the front of the cabinet.

When installed successfully, these hinges can open to a maximum of 165°.

TOOLS REQUIRED

#2 Screwdriver

Pencil or Scribe

Ruler (in. and mm)

Drill

35 mm boring bit (Forstner bit)

RECOMMENDED NUMBER OF HINGES

Use this diagram to determine how many hinges you will need for your door. If you are hanging a door with a mirror or a door that is wider, you will need additional hinges.

FRAMELESS VS FACE FRAME CABINETS

Face Frame cabinets have vertical stiles and horizontal rails that reinforce the cabinet structure and provide mounting and support for doors and drawers. Frameless cabinets don't have any face framing.

Installation

1 Pre-drilling the installation holes

- Use a pencil and ruler to measure and mark the installation locations as this diagram shows.
- Then use a 1-3/8 in. (35 mm) boring bit to drill the door hole 7/8 in. from the edge. Ensure the door hole is a minimum of 1/2 in. (12.8 mm) deep. Do not drill through the door face.

2 Installing the hinges to the door

- Insert each hinge (A) into the pre-drilled hole in the door and secure using two screws (D) for each hinge (A).

3a Installing the mounting plates to the cabinet

- Align the mounting plates (B or C) and fasten with two screw (E) - See installation diagram on next page.

4 Installing the door to the cabinet

- Open the hinges (A) to the fully-extended position.
- Connect the hinge arm (A) to the mounting plates (B) and press the rear of hinge arm (1) down until they snap to the plates.

5 Adjusting the door

- **Height Adjustment:** Loosen the top mounting screw (1) to adjust the door up or down.
- **Overlay Adjustment:** Turn the adjustment screw (2) to adjust the door overlay.
- **Depth Adjustment:** Turn the eccentric screw (3) to adjust the distance of the doors from the cabinet.
