

Where Consciousness Meets Innovation.

## SAFE PAW – USE AND CARE MANUAL

Safe Paw Pet-Safe Ice Melter is like no other product on the market. It has a unique patented dual-effect compound, made up of crystalline amide core infused with special glycols. This non-corrosive composition gives Safe Paw a two-way timed-release action. The liquid component starts melting ice instantly while breaking its surface tension. This allows the crystal-core to quickly penetrate and destabilize the ice and speed up the melting process.

Safe Paw attracts heat to make it even more effective but does not give off heat. This “endothermic” reaction takes advantage of solar effect and provides extra melting power during daylight hours. As an added feature, Safe Paw leaves an invisible protective shield that prevents ice from sticking to the surface for up to three days, making shoveling much easier.

Safe Paw offers ‘4-P’ protection:

- 1) **Pets:** Safe Paw does not burn pets’ feet and their digestive systems are unaffected (*if consumed*)
- 2) **People:** Children are also safe
- 3) **Plants:** Vegetation stays alive and healthy
- 4) **Property:** All surfaces, including pavers and wood decks, remain in great condition.

Details:

- ❖ **Coverage:** Safe Paw offers two times the coverage of salt and lasts up to 3 days. One 8 oz. cup covers approximately a 100 +/- sq. ft. area
- ❖ **No harmful ingredients:** *Dry, spreadable product with NO salt, NO potassium, NO calcium, and NO nitrogen.*
- ❖ **Totally safe for the environment:** *No dead spots along walkways, in grass, shrubs, detention basins or eco-sensitive areas. Safe for all surfaces, including concrete pavers and wood decks.*
- ❖ **Leaves no residue:** *No complaints about “salt powder” on walkways, entry areas, wood floors and rugs.*
- ❖ **Melts at -2° F for up to 3 days:** *Well below the effective range of salt-based products.*

Product properties: *(some details omitted due to patent privacy)*

- ❖ A patented dual-effect compound made up of crystalline amide core infused with special glycols.
- ❖ This non-corrosive composition gives Safe Paw a two-way timed-release action.

- ❖ The liquid component starts melting ice instantly while breaking the surface tension.
- ❖ The crystal-core quickly penetrates and destabilizes the ice which speeds up the melting process.
- ❖ Attracts heat to make it even more effective but does not give off heat. This "endothermic" reaction takes advantage of solar effect and provides extra melting power during daylight hours.
- ❖ Leaves an invisible protective shield that prevents ice from sticking to the surface for up to three days.
- ❖ Composed of six active ingredients which include a modified crystalline amide core infused with special glycols, its patented dual-effect compound provides a non-corrosive composition with two-way timed-release action.
- ❖ The liquid component starts melting ice instantly while breaking its surface tension. It works down to 2° degrees below zero. This allows the crystal-core to quickly penetrate and destabilize the ice and to speed up the melting process.

**Directions:**

*Apply to snow and icy surfaces. Remove excess slush. Avoid generating dust. Wash hands after use. Avoid contact with eyes and skin. Keep container securely closed and away from children. In case of eye contact: wash immediately with water and consult medical attention.*

**Contents :**

*Modified carbonyldiamide Crystal, Special Glycols, Non-Ionic Surfactants, and special glycols.*

**Note:**

*Color variations will not impact product performance.*
