

TITAN TRANSCEND SERIES

TITAN

YOUR WINE, OUR PASSION

TITAN APPLIANCES

At Titan, we put our customers' satisfaction first.

Titan appliances are designed with form and function in mind, and promise to bring sophisticated style and convenience to your home and kitchen. Our portable and compact appliances offers the very best in contemporary living.

YOUR WINE, OUR PASSION

We are all fellow wine enthusiasts that appreciates a well-preserved bottle of wine, from a buttery Chardonnay to a beautifully aged Burgundy. TITAN's coolers ensures that every one of your carefully handpicked bottle of wine is protected from the elements and kept at the ideal serving temperature ready for you to enjoy it.

- o Five roller glide stainless steel trimmed wire shelves (almost 95% slide out)

ENJOY THE MOMENT

Temperature Range For Whites or Champagnes:

Get your white wines or champagnes at the temperature you desire. This unit adjusts to as low as

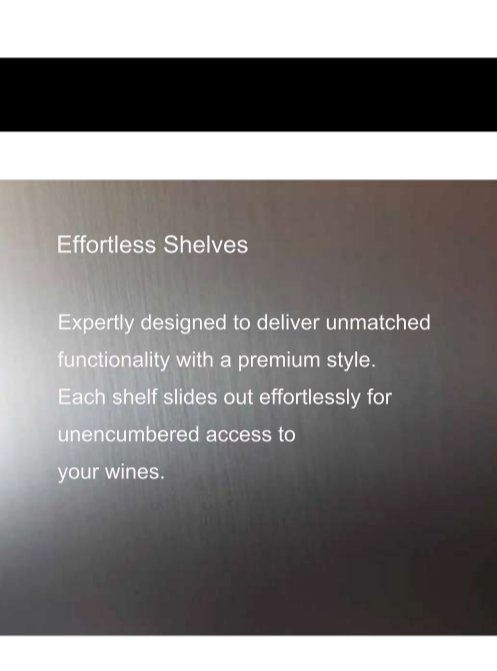

38°F

Temperature Range For Reds:

Provides **50°F - 72°F** temperature

range to preserve all of your collections.

NO DETAIL IS TOO SMALL

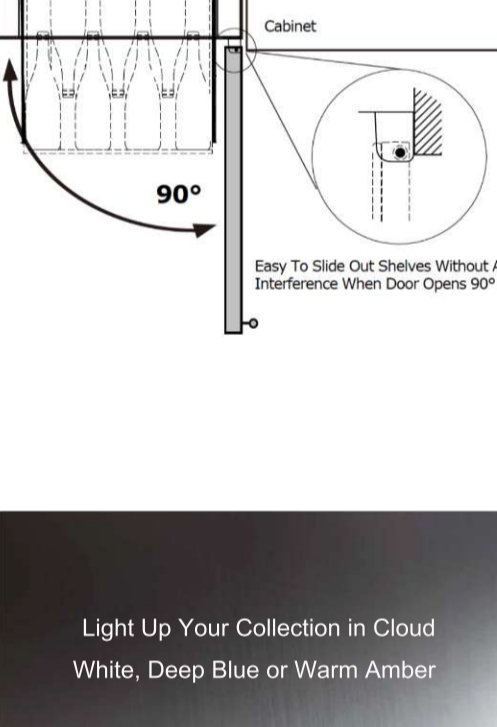

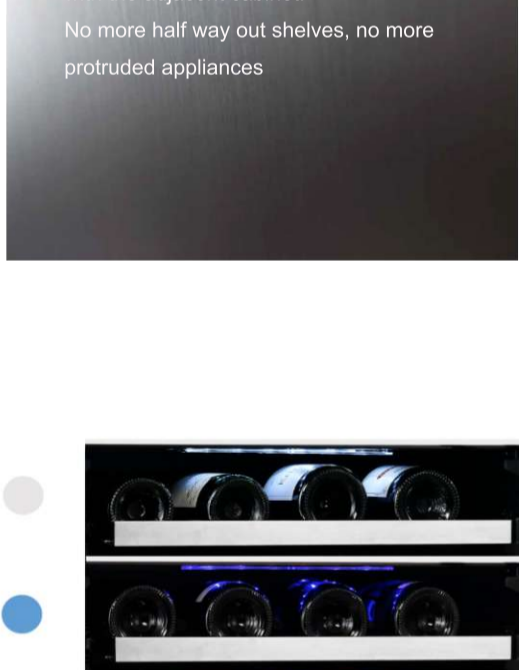

Effortless Shelves

Expertly designed to deliver unmatched functionality with a premium style. Each shelf slides out effortlessly for unencumbered access to your wines.

Designed Shelf and Cooling Zone to Store California, French or Italian Wine Bottles

Diligently designed wine shelves will fit bottles from 3 to 3 3/8. The first wine shelf of each zone will even fit 3 1/2" bottles perfectly.

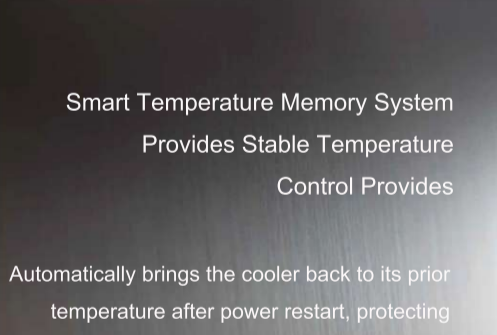

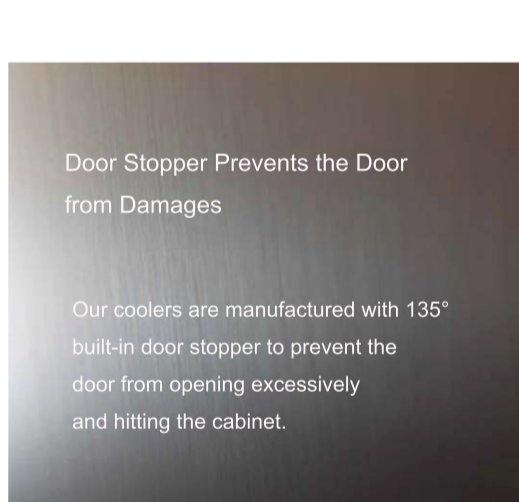

Flush Installation

A perfectionist? Our professionally designed zero clearance hinge allows the door to open unobstructed without interference with the adjacent cabinet. No more half way out shelves, no more protruded appliances

Light Up Your Collection in Cloud White, Deep Blue or Warm Amber

Our premium wine cooler is designed with three color LED lighting in cloud white, deep blue and warm amber. Easily adjust lighting to create the right moods for a lively party or a quiet romantic night.

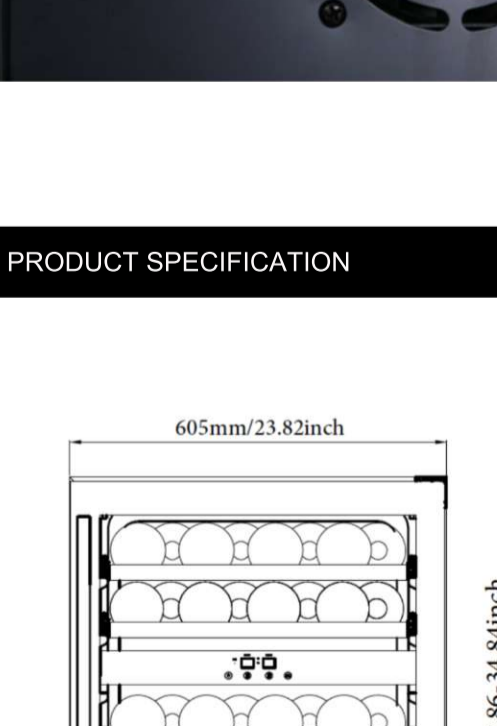

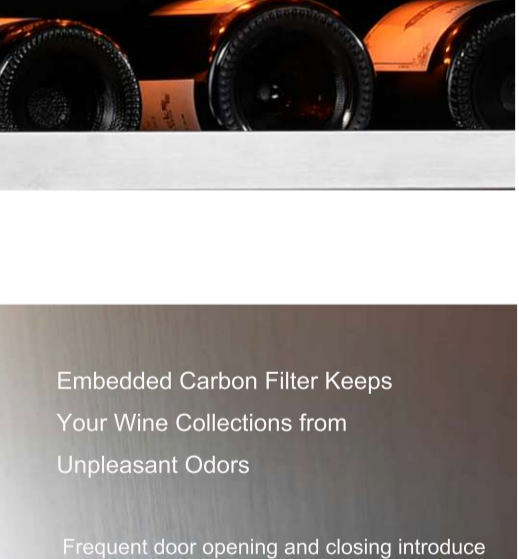

Door Stopper Prevents the Door from Damages

Our coolers are manufactured with 135° built-in door stopper to prevent the door from opening excessively and hitting the cabinet.

Smart Temperature Memory System Provides Stable Temperature Control Provides

Automatically brings the cooler back to its prior temperature after the power restart, protecting your wine from heat damage

A door alarm chimes in case the door is left ajar or temperature rises above the optimal levels.

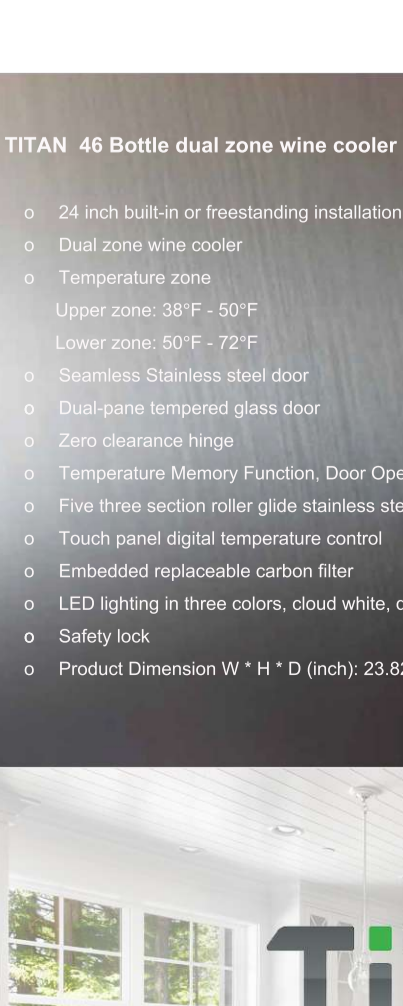

Embedded Carbon Filter Keeps Your Wine Collections from Unpleasant Odors

Frequent door opening and closing introduce unwanted odors that alter the flavor and character of your wines. Our coolers are embedded with carbon filters to purify the air from within, maintaining ideal conditions for your reserves.
