

Delicious, Naturally!

**5 Quart Slow Cooker
with natural stoneware crock**

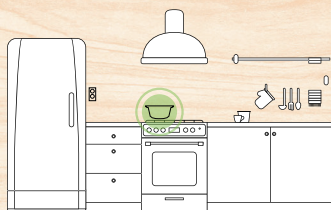

RJ15-5-N

Versatile Slow Cooker

It's not just a healthier way to slow cook - it's an easier way to cook anything! Without PTFE, PFOA, or any of the added chemicals found in typical crocks, this naturally non-stick stoneware is oven and stovetop safe, and can be used to sauté, sear, or steam foods over an open flame; re-heat or roast foods directly in the oven; and of course as a typical slow cooker for decadently delicious slow-cooked dishes. The crock can go into the refrigerator to save for later, and is dishwasher safe, so cleanup is a breeze.

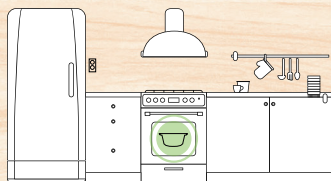

Stovetop

Sauté vegetables or brown meat directly on the stovetop before slow cooking for greater depth of flavor.

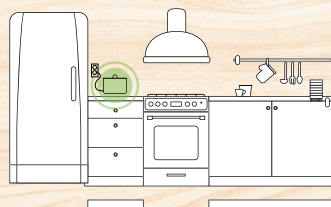

Oven

The non-stick, natural stoneware insert can be used for oven roasting and reheating.

Countertop

Slow cook for a wide range of family favorites like chili, soups, stews and more.

Revolutionary material contains

75% less lead

than traditional slow cooker crocks for healthier eating
