INSTRUCTIONS

Always tie down the **front and rear** of the kayak. The included tie-down ropes or cam buckle straps may be used. Attach the tie-downs to a secure, metal tie-down point on the vehicle, such as a tow loop, frame hole, or metal bumper, and a secure point on the kayak, such as a grab handle. Make sure the front and rear tie-downs have even pressure. Be careful to not overtighten.

Straps may wear paint at contact points. To prevent damage, make sure contact points are clean and padded with a strap protector or soft cloth.

Center Tie-Downs: Loop the black cam buckle straps around the center area of the kayak and the vehicle roof, looping them through the open vehicle doors. Tighten each strap securely.

Only throw the **non-buckle side of the strap over the canoe.*
