

Installation:

- Use 15 - 25 ft. flag poles with a 1/2"-thick rod at the top.
- Leave outdoors where the sun is fully unobstructed during the day.
- After the day charge, press the switch into "On" – This will turn on the auto-on function.
- Remove the previous ornament from the top of the flagpole.
- Install Anley solar Led flagpole light and it will light up automatically at night

Kindly Remind:

- Pole, flag and top ball are not included.
- Please remove the film on the solar panel and push the switch to ON before using. Be sure to turn the light "ON" via the ON/OFF button before installation.
- The LED light won't light up until night. If you want to test the product in daylight, charge the product for a while first, cover the solar panels and turn on the switch. Otherwise, the light will not turn on at all.
