

CARTA

by PLOTT 

- Draw paths in real-time
- Accurate material estimation
- Shareable files for collaboration
- Guidance to real-world points
- Add notes, images, & videos
- Calculate distance, perimeter & area

Create a Control Center for Your Entire Project on Your Phone

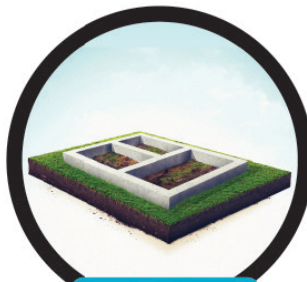

Carta is the first measurement wheel to digitally map a space. Draw paths in real time over images and blueprints and add notes, images, and videos to your projects within the Plott app's control center. Record distance, area, and perimeter of any space, saving time, eliminating complex math, and eliminating wasted materials on the job. Once your project is finalized, Carta can take you back to specific points in your design.
