

STARLIKE EVO

Made In Italy

➤ 2 Part Epoxy Mortar

Two-component acid-resistant epoxy grout for the laying and grouting of ceramic tiles and mosaic with joints between 1 and 15 mm (0,039 - 0,59 in) width. Extremely easy to apply and clean. Suitable for direct contact with food substances.

➤ Extremely easy application and cleaning, even compared to normal cementitious grouts.

Prevents the release of colour pigments onto ceramic surfaces.

➤ The extreme fineness of the sintered micro sphere with fine granulometry makes it possible to obtain highly smooth and compact finishes.

➤ Stable and uniform colouring for all types of tiles with exclusive colour effects.

➤ High mechanical strength.

➤ Waterproof.

➤ Total absence of cracking or crazing after hardening.

➤ Excellent chemical resistance.

➤ Unlike other epoxy grouts on the market, Starlike® EVO catalyst (component B) is only labelled as irritant. It is neither corrosive nor hazardous for the environment.
