UYBWM C	Color Carton For Uybwm t	1
UYBWM R	Spare Rollers For Uybwm t	1
UYBWM W	Grey Wheels For Uybwm t(Set Of 4)	1

1. DTA Bucket Grout System is designed to speed up the grouting time and make the job easier.
2. Fill 6-gallon bucket with water above grate.
3. Use the handled sponge with the perforations which is included in system. The perforations will allow the sponge to pick up more sediment and remove from the tile surface.
4. Take dirty sponge and place over the bottom of grate and push up and down to remove material.
5. The grout particulate will fall to the bottom of the bucket leaving the clean water on top.
6. Run sponge over the rollers to remove excess water and debris. Excess water can distort the grout. Be sure to push the corners of sponge over the rollers to ensure proper water removal.
7. Repeat process until tile is clean.
8. Dispose sediment properly.
9. Clean bucket thoroughly for the next use.
