

SUNBRELLA® AND THE ENVIRONMENT

The Sunbrella team is committed to consistently and creatively conducting business in an environmentally responsible manner.

ISO 9001 and ISO 14001

Our ISO 9001 Quality Management and ISO 14001 Environmental Management certifications demonstrate commitment to providing exceptional products and services while recognizing our environmental responsibilities.

Reducing Our Carbon Footprint

Projects such as the installation of a 500-kilowatt solar panel system at our Norlina Plant and the upgrade of all lighting fixtures in three warehouses reduce annual CO2 emissions by over 1,000 tons.

Zero Landfill

Anderson is recognized as a member of the South Carolina Environmental Excellence Program as a result of our recycling and waste reduction programs. The Anderson team recycles all of its waste – including industrial materials, packaging, office and cafeteria waste.

GREENGUARD Certified

All Sunbrella and Firesist® fabrics are certified by the GREENGUARD Institute's Children and Schools standard for contributing to healthy indoor air quality by being a low emitting interior product.

Sunbrella Renaissance Fabrics

Sunbrella Renaissance furniture fabrics combine up to 50% post-industrial recycled Sunbrella fiber with virgin Sunbrella fiber to achieve vintage charm, rich coloration, soft feel and excellent performance.

Sunbrella Durability

Because Sunbrella fabrics last longer, people use less fabric and generate less waste as compared to other fabrics that might fade, lose strength or succumb to mildew and atmospheric chemicals.

Wastewater Reduction

Our unique coloring process eliminates the harmful chemical effluents of conventional dyeing processes.

Skin Protection

The Skin Cancer Foundation recommends Sunbrella fabrics in shading products as an aid in the prevention of sun-induced damage to the skin as a part of a complete sun protection regimen, including regular use of sunscreen.

RECYCLE MY SUNBRELLA

The Recycle My Sunbrella program reclaims pre- and post-consumer Sunbrella waste and repurposes it for use in a variety of products. For more information, visit www.recyclemysunbrella.com.
