The Premier  
Pull Handle for  
Storm & Screen Doors

Design patent protected

## The innovative DX pull handle:

The most elegantly styled handle ever installed on a storm door.

An Original design by Ideal Security, the DX Pull handle is available in bright and painted finishes as well as custom paint colors. The matching key lock (CR3) is available in all matching finishes and functions with 2 styles of inside deadbolts, also available in bright or painted finishes.

The DX is available in a variety of latch sets or full kit formats, with or without key lock and deadbolts.

- 1-3/4" standard hole spacing
- Matching CR3 key lock
- Inside latch options: WC, ZD, TX, NA & 357
- Adaptable to Ideal's unique touch-bar exit system

## FOR THE RETAIL MARKET:

### The SKDX and SK703 Series

Includes the DX handle with back plate, inside WC-latch (with locking mechanism), and fasteners for doors from 1" to 2-1/8" thick. Available in brass e-coat, satin nickel, and painted white and black with matching inside latches.

The SKDX will replace all surface mount push button, pull and lever handles using standard 1-3/4" hole spacing.

The SK703 series of keyed deadbolts complements the appearance of the DX handle. It is available in the same finishes as the SKDX handle. New holes are required for new installations. All required screws and spindles are included for doors 1" to 2-1/8" thick.
